SHIMANO FUSION
CONCEPT APPAREL,
EYEWEAR, BAGS,
AND FOOTWEAR
ARE ENGINEERED TO
BECOME ONE WITH
THE MOST VITAL
COMPONENT OF ALL—
THE RIDER.

We understand cycling. We understand cyclists.

Riders of every level know SHIMANO for one reason: We engineer the most technologically advanced, most seamlessly integrated solutions in the cycling world. SHIMANO FUSION CONCEPT cycling wear is created using the same approach as our world-famous componentry. Systems that disappear beneath you, leaving nothing but you and your ride.

SYSTEM ENGINEERED TO INTEGRATE AND WORK FLAWLESSLY AS YOU RIDE.

We've heard the great ride described as "having no chain." The truth is, on a great ride, everything disappears. There's nothing left but nature and the connection that comes from the harmony of rider and bike.

It's technologically advanced apparel, eyewear, bags and footwear that have been system engineered to integrate and work flawlessly as you ride. FUSION CONCEPT elevates performance, increases confidence and enhances enjoyment. It's SHIMANO technology with a human touch.

For nearly a century our mission has been to bring innovation, performance, comfort, safety and a better ride to every cyclist, every day. And then? Our goal is to make it all disappear.

WE'RE NOT
OBSESSED WITH
TECHNOLOGY,
WE'RE OBSESSED
WITH WHAT IT
CAN DO.

With nearly a century of innovation under our wheels, we've thrown out more ideas than most other brands have come up with. Why? Because of SHIMANO's system engineering philosophy.

We don't just make the world's best cranksets, shifters, derailleurs, chains, brakes and pedals. SHIMANO's system engineering philosophy creates components that perform precisely and beautifully together, forming interconnected systems.

SHIMANO FUSION CONCEPT is a natural extension of our systems engineering philosophy. Each and every piece of FUSION CONCEPT on-the-body gear is infused with innovation, benefit-driven technologies and an obsession with creating a better ride experience.

SHIMANO FUSION CONCEPT

**EVERY RIDER.
EVERY RIDE.
EVERY DAY.**

SHIMANO FUSION CONCEPT

INNOVATION WHERE IT MATTERS. COMFORT WHERE IT COUNTS. PERFORMANCE AT EVERY TURN.

We live to ride and ride to live. It takes us places, physically, mentally, and spiritually. It can turn a bad day around, and make an amazing day even better.

SHIMANO believes that every cyclist—competition to commuter, randonneur to recreational, elite to enthusiast, on tarmac or trail—deserves to have equipment that performs flawlessly.

Pinning a number on? S-PHYRE is for you. Infused with more innovation per gram to pursue speed with a vengeance. Looking for efficiency in every seam and detail? FUSION CONCEPT delivers performance as only SHIMANO can. Riding the backwoods, backstreets, bike paths or to the bar after work? Explorer Series cycling wear is purpose-built for every place on (and off) the map.

For every rider, for every ride, for every day, SHIMANO FUSION CONCEPT doesn't leave a single cyclist behind.

THE WORLD'S LARGEST CYCLING TEAM.

And every cyclist is on it. Thousands of Team SHIMANO employees around the world spend much of their time riding and interacting with cyclists of every discipline. Our product managers travel the globe to listen and learn from cyclists at all levels, mechanics at shops and race events, and our retail partners; all to improve the performance of the products we bring to market.

Once we've identified opportunities, our product planners, designers, and engineers start developing, refining, and testing ideas to create new products and update existing ones. We take these ideas back to skunk works testers, techs, and sponsored racers and teams to validate our findings. We test, refine, and repeat until we deliver products that enhance the ride experience, for every cyclist.

THE POWER OF RIDER- CENTERED DESIGN

SHIMANO FUSION CONCEPT offers the cutting edge of form, fit, and function, allowing the body to perform and look its best. Our engineers and designers create products that integrate seamlessly with the rider and the environment.

FORM

Every SHIMANO FUSION CONCEPT product has clean and functional aesthetics. They're at ease with speed, at home on the bike, and comfortable getting coffee. We have refined the overall look using minimalist designs, integrated graphics, and on-trend colors that sync with consumer desires. Because we believe the most advanced technologies don't need to scream to be heard.

FIT

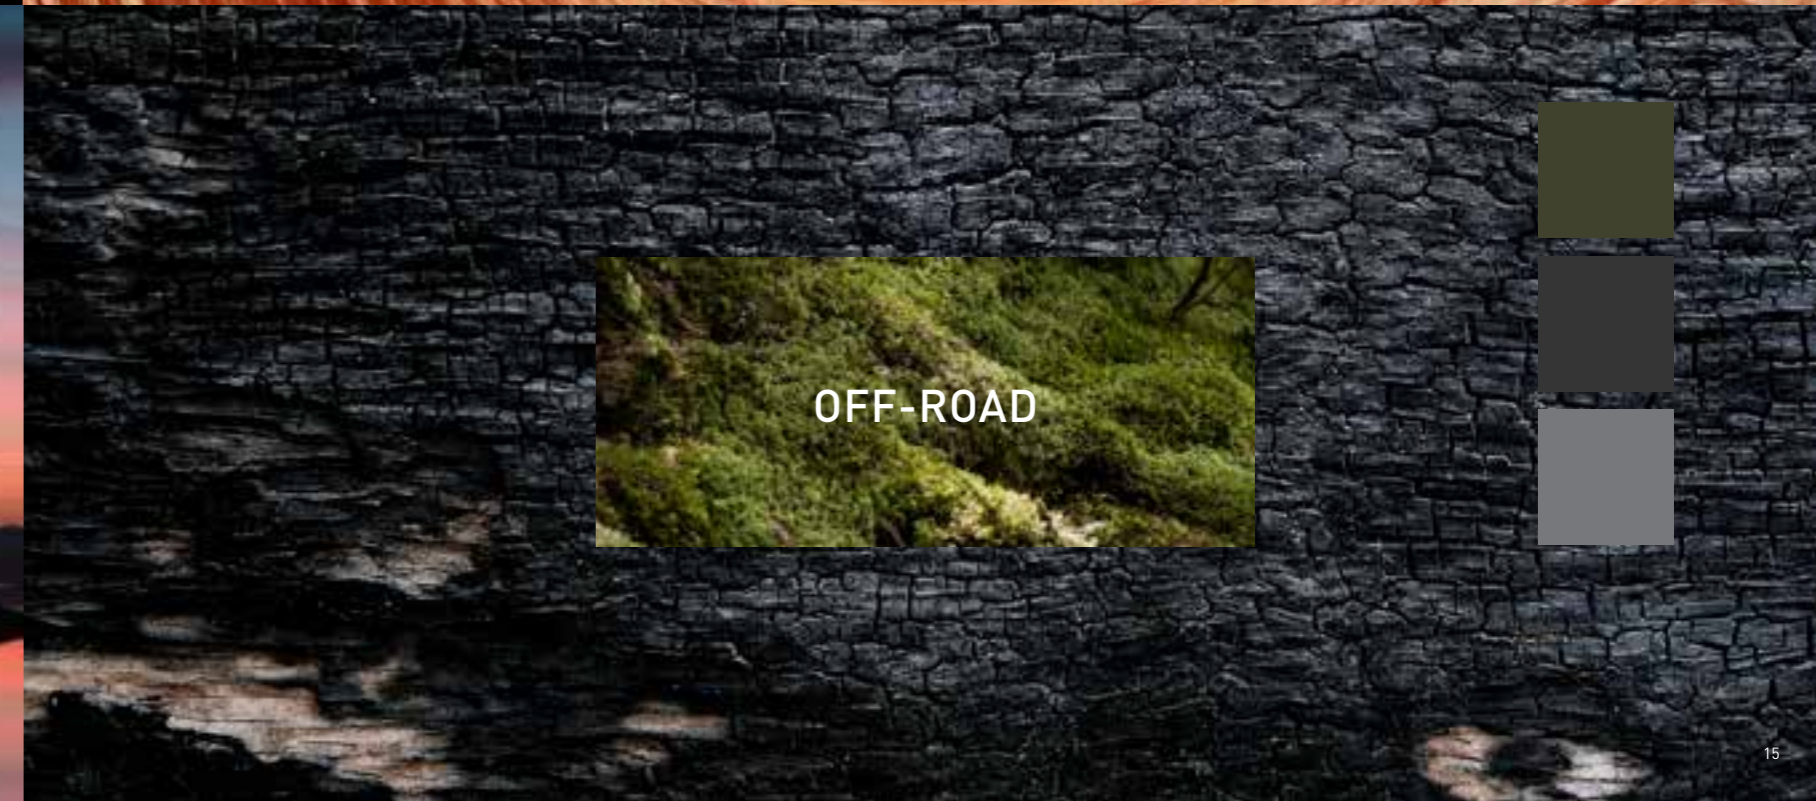

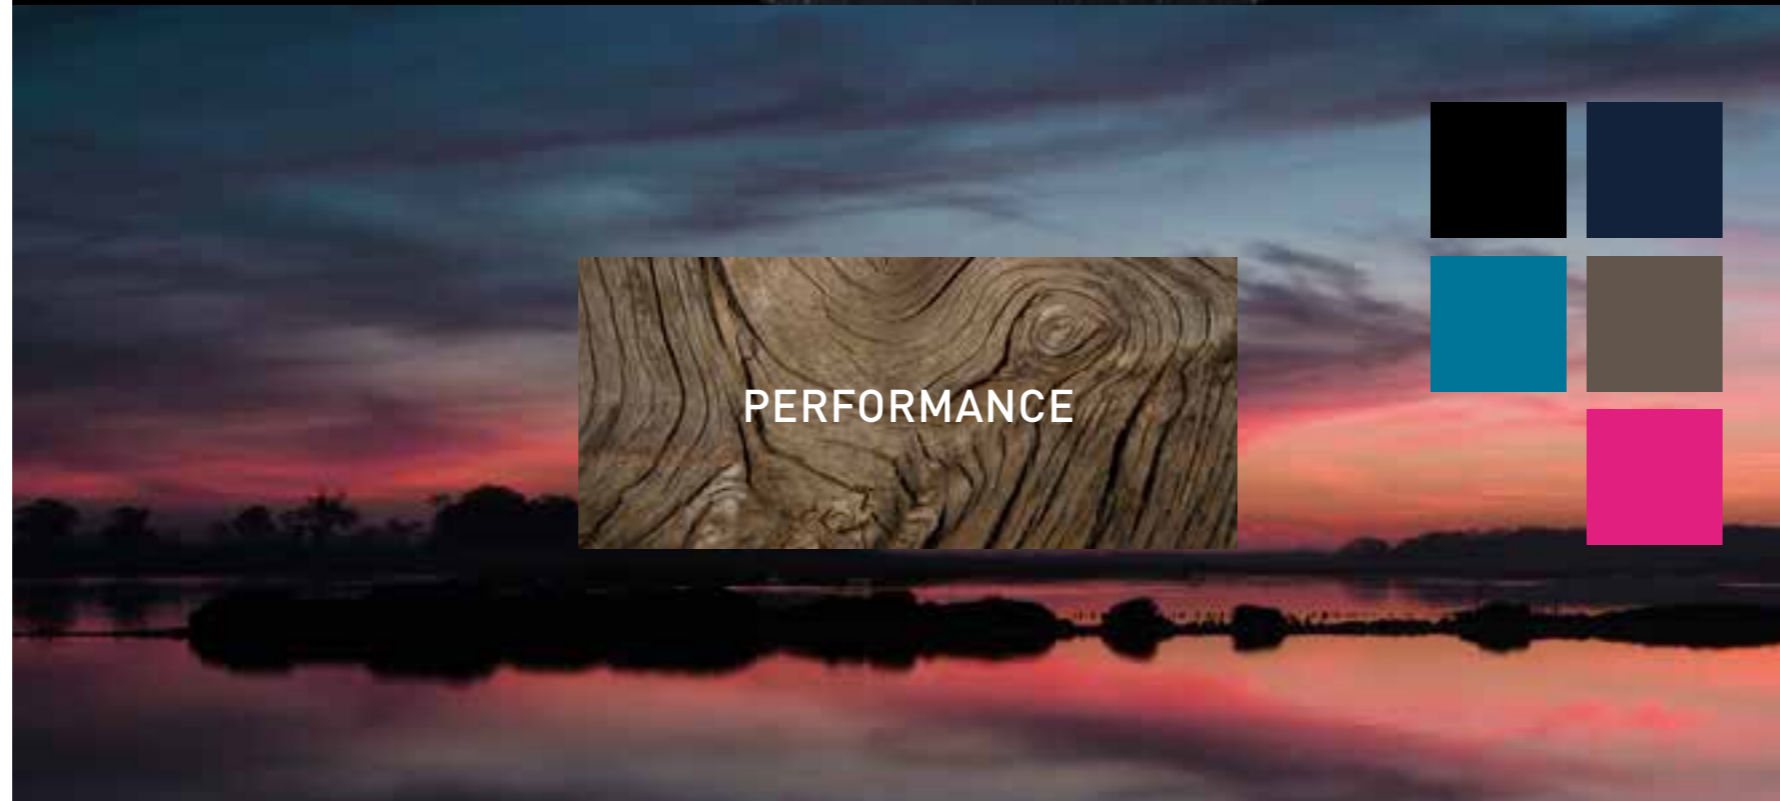

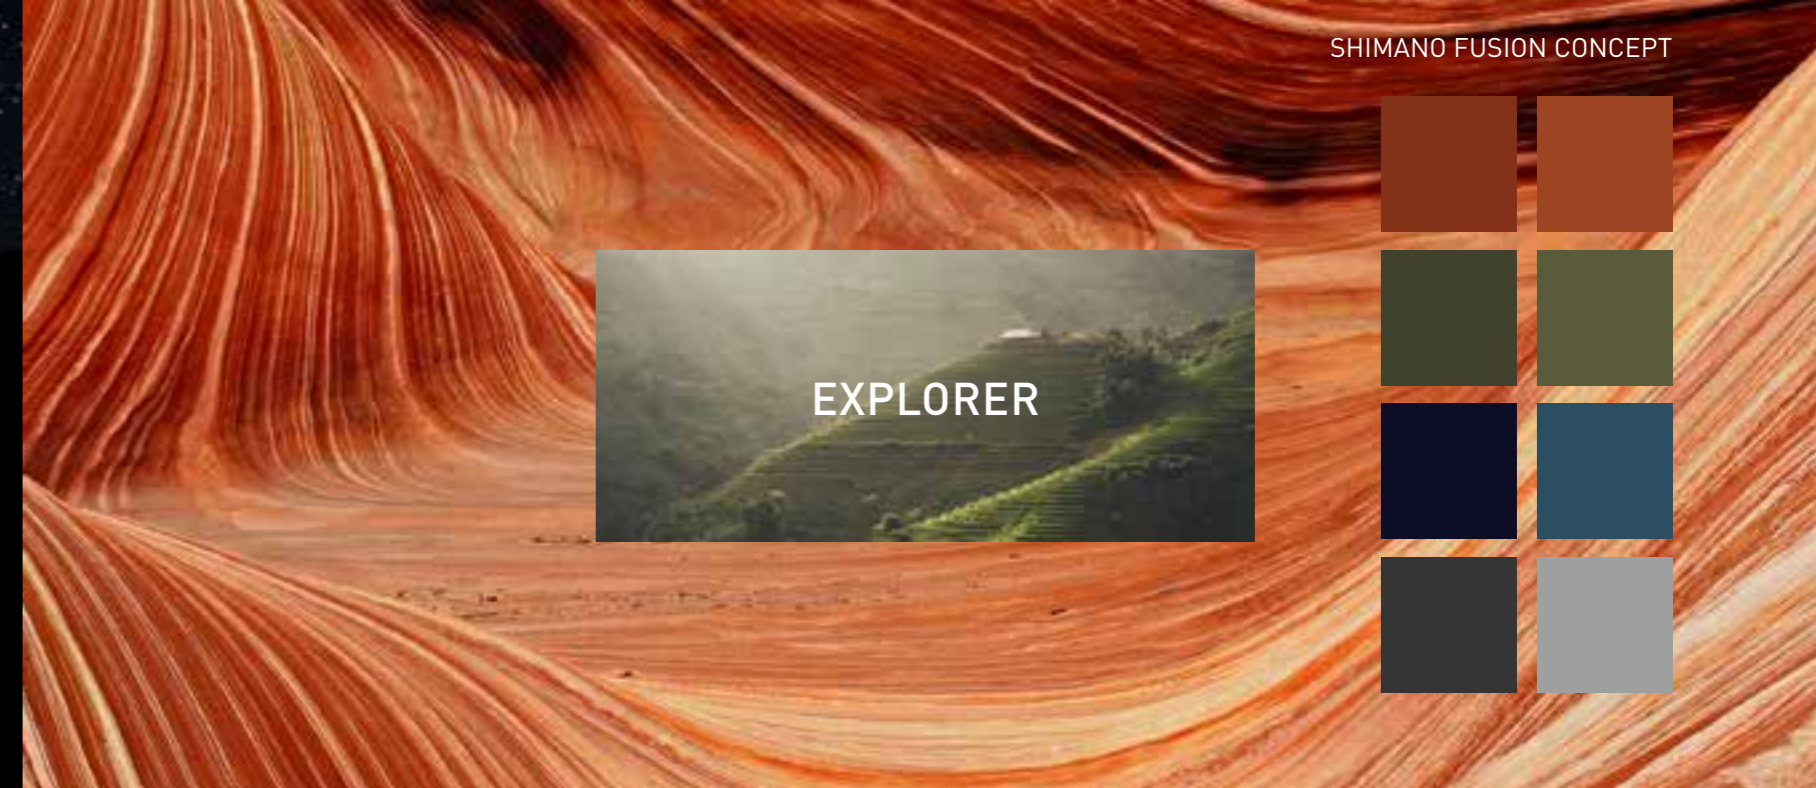

SHIMANO's attention to detail is world-renowned. We know the smallest details make the biggest difference. And we are, once again, raising the bar on fit, across every product in our line. Our footwear offering continues to set the standard for comfort with more rider-specific fit options and widths for every need. Every design, seam, and detail have been analyzed and fine-tuned to create a fit tailored to perform from head to toe.

FUNCTION

We are focused on functionality for every rider. It's not just racers that sweat in hot conditions or need to maintain the right temperature. That's why we have optimized materials, pattern details, and fabric technologies to offer thermoregulation in every piece we offer. Our unique Discreet Reflectivity methods combine cutting-edge innovation with style in service of rider safety. And to prove that we sweat the details, every product utilizes System Engineering to create added functionality.

2018 COLOR PALETTE: INSPIRED TO PERFORM

SHIMANO FUSION CONCEPT features colors and designs inspired by nature, technology, and emotion. Race-inspired, sophisticated, stylish, stealth, harmonious, and on target.

RACING IS LIFE...
EVERYTHING ELSE IS JUST WAITING

– Steve McQueen

THERE ARE PLACES FOR CONVENTIONAL THINKING... AND THEN THERE IS S-PHYRE

To many people, the requirements of professional riders are unreasonable or unrealistic. To Team SHIMANO, they are exactly the demands that drive us to challenge the status quo and solve previously unsolvable problems. The unrelenting pressure from professional racers to ride faster, further, more efficiently, and more comfortably is the way we challenge new ideas and create solutions that work for all riders.

By providing LottoNL-Jumbo with a full range of performance clothing and footwear we are able to extend our head-to-toe strategy, maximizing the performance of every component of the bike and the rider. We look forward to working with LottoNL-Jumbo in the coming season to develop and progress the breadth and quality of SHIMANO cycle clothing.

– Richard Keeskamp

TAKING PERFORMANCE TO NEW LEVELS

A single word drives our development process – performance. New and refreshed products across apparel, bags, footwear, and eyewear highlight our continued focus on elevating the Road Performance category. With every Performance Series product we continue to deliver on our promise to bring more function, more quality, and more innovation to every rider.

Evolve delivers a sleek and sophisticated level of Road Performance apparel that raises the bar for going further, faster.

THE RELENTLESS PURSUIT OF WHAT'S NEXT

Grand Fondos, Centuries, and multi-day events are the proving grounds for SHIMANO Road Performance products. When comfort is equally as important as speed, sweating every detail matters. We incorporate hidden technologies inside, and finish them with sleek and stylish designs on the outside. SHIMANO Performance — the name says it all.

The Road Performance Collection features the new Evolve line, an updated Breakaway Series, and the refined Hot Conditions Jersey family. The Spring/Summer products truly deliver performance at every turn of the pedals.

ON-ROAD PERFORMANCE MEETS OFF-ROAD GRIT

Getting dirty continues to take on new variations every year. Freeride, gravity, downhill, all-mountain, XC, or gravel grinding each demand gear designed to deliver. With innovation as our starting point, Mountain Performance products bring SHIMANO quality to the trailhead, no matter what form of dirt you ride.

We have also expanded and refined our platform segment of shoes and pedals. We have upgraded our classic AM shoe designs and created a full line of Gravity platform pedals and footwear with features and details that add to the world-class SHIMANO Pedaling Dynamics family.

A MOUNTAIN OF INNOVATION

Better, quicker, lighter, integrated, and durable. These are just a few of the words to describe what the Off-Road segment updates and additions bring to the SHIMANO line. We have combined new thinking with years of experience to create products across the Off-Road categories that earn the SHIMANO name at every pedal stroke.

IGNITE YOUR PERFORMANCE

S-PHYRE has one goal: to maximize power transmission by delivering more performance per gram, cheating the air, and using linkage effect to power efficiencies.

S-PHYRE embodies SHIMANO's passion to create the best, deliver results, and ignite your performance.

S-PHYRE

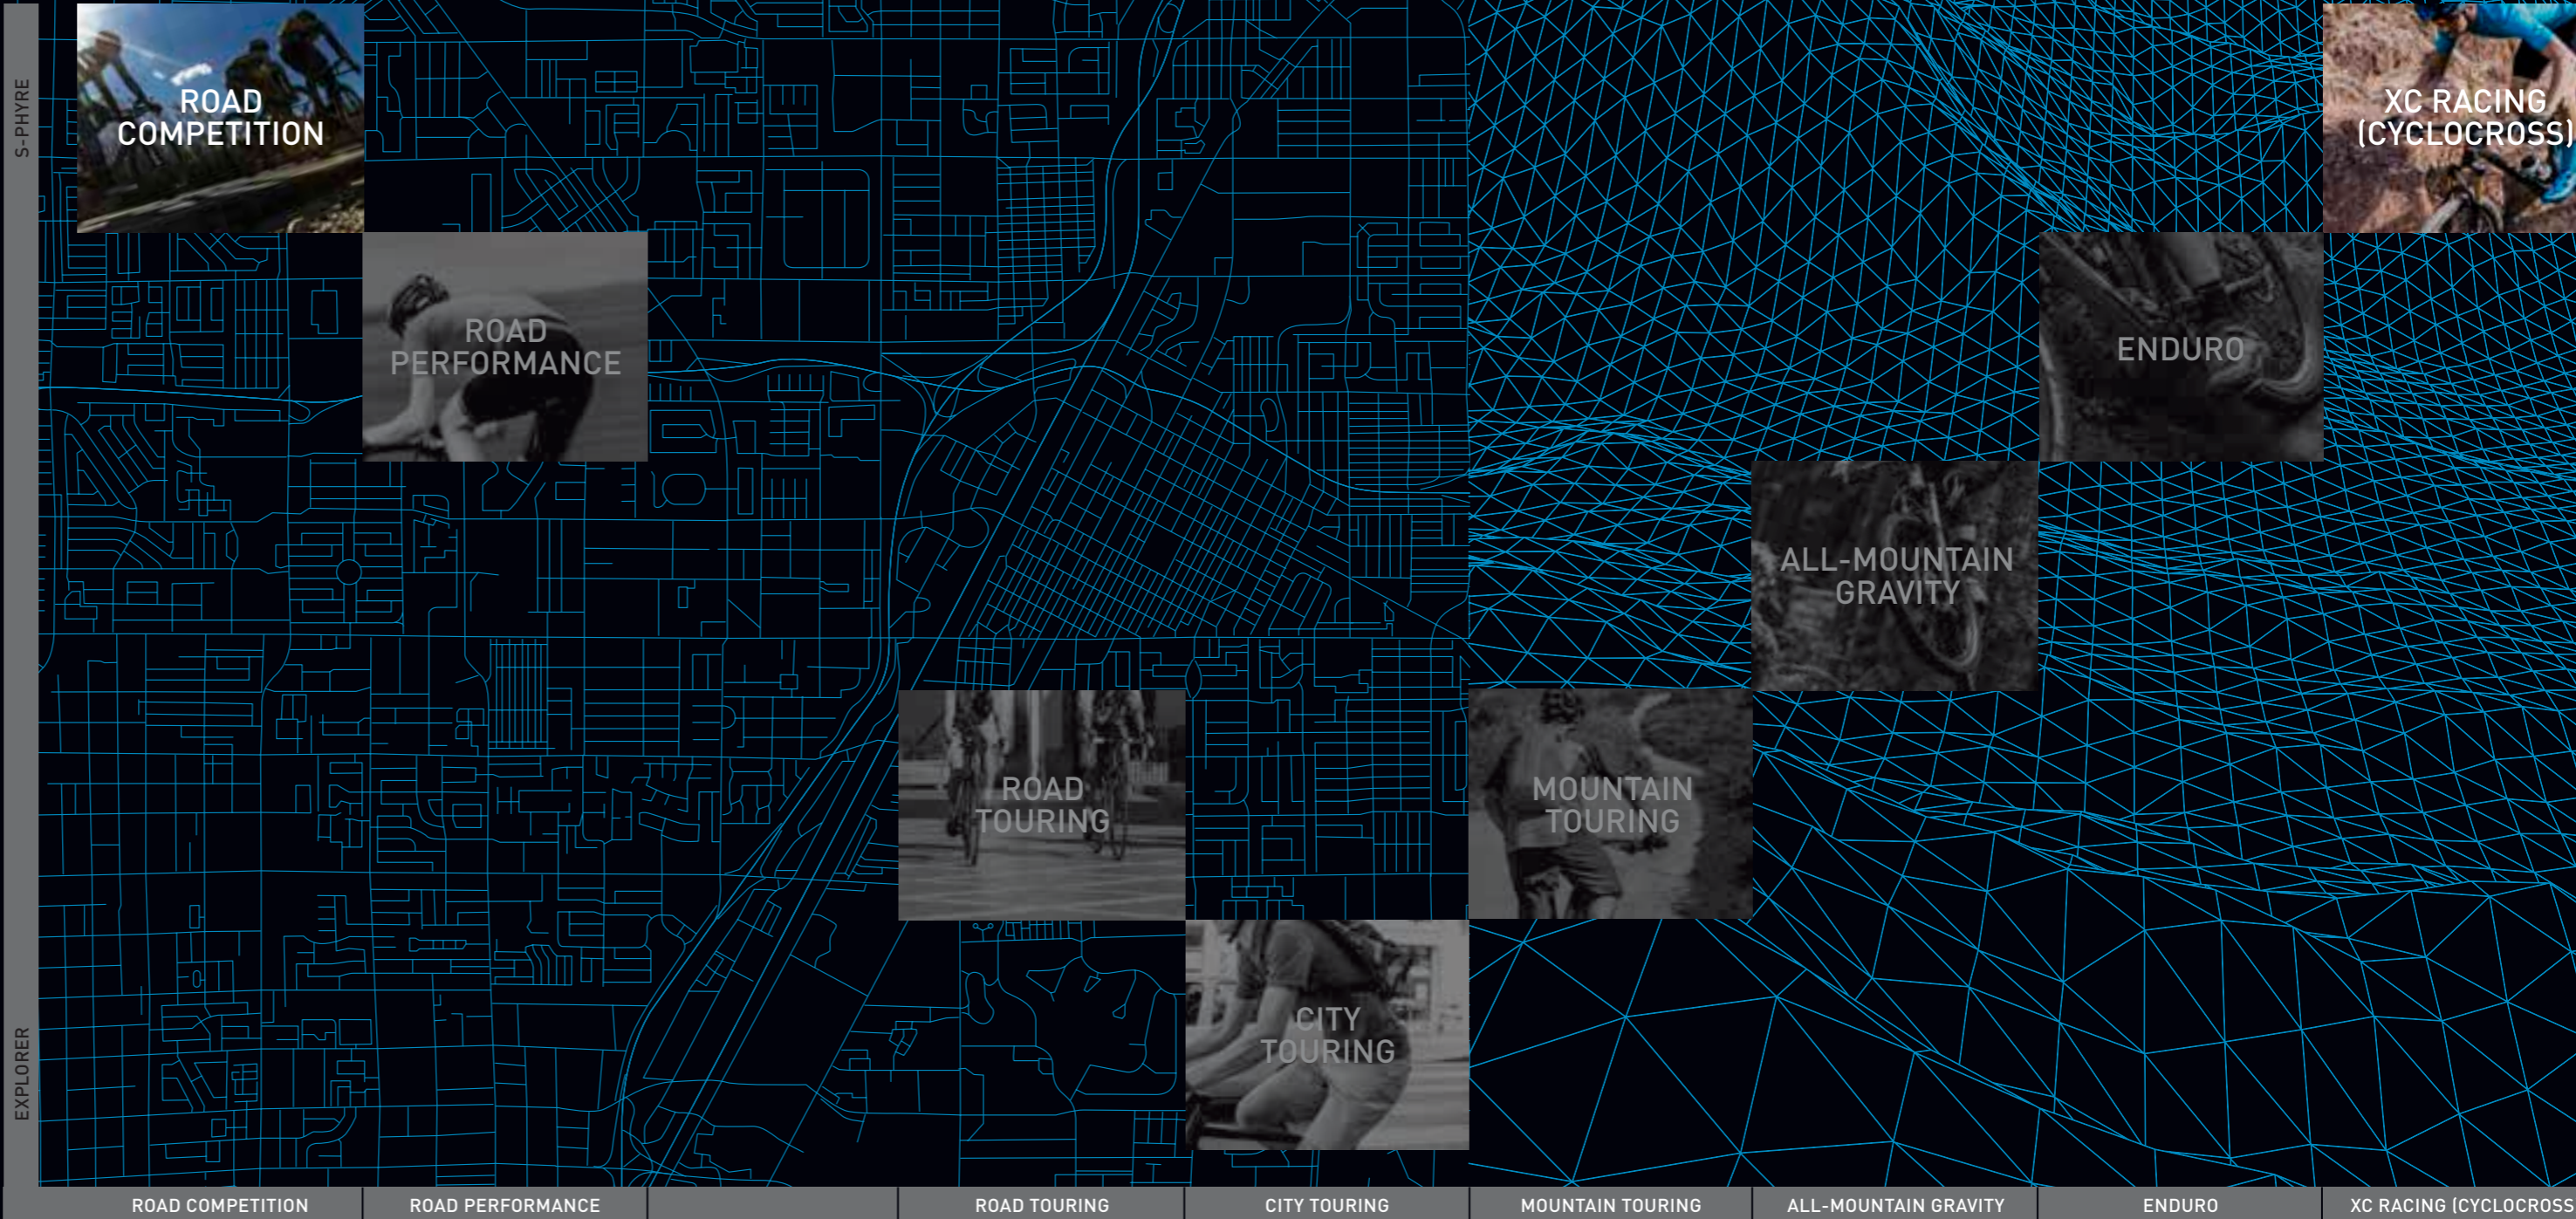

THE NEWEST BENCHMARK OF PERFORMANCE FROM SHIMANO

When you've led as many races as we have, you learn a lot about what it takes to win. And S-PHYRE is the newest expression of SHIMANO's passion for leading. We've taken everything we know about performance and created the pinnacle of SHIMANO FUSION CONCEPT.

Meticulously engineered, S-PHYRE turns technology into performance, effort into victories, and dreams into realities.

Our goal and promise is to bring to market technical wear so advanced that it empowers you to achieve your next level.

EYEWEAR

NOT A SINGLE WATT LEFT BEHIND

Power generation is hard enough. Riders don't need to lose watts to the physics of aero drag, friction or overheating. S-PHYRE is engineered to limit losses through technological advancements that only SHIMANO could invent.

PHYSICS

Speed lives in the details. We have re-considered everything about how drag, friction and excess weight fight against forward movement. Patterns are fine-tuned, materials are selected to reduce drag and constructions are engineered to limit rotating mass.

PHYSIOLOGY

Heating/cooling demands are a variable driven by exertion and situation. Controlling and maintaining body temperature delivers more power, more consistently, in more situations. S-PHYRE works intuitively to maintain optimal body temperature so the rider can concentrate on power generation.

LINKAGE EFFECT

S-PHYRE linkage effect is built on SHIMANO core System Engineering philosophy. One piece interacting in harmony with the next provides a higher level of performance. S-PHYRE products are designed to unify the rider, gear and bike. Because suffering should come from the effort—not from what you wear.

S-PHYRE lives up to everything you expect from SHIMANO, and everything we demand from ourselves.

INCREASED SPEED BY REDUCING DRAG, FRICTION AND EXCESS WEIGHT

DUAL MICRO-ADJUST LACING
DUAL INDEPENDENT BOA IP1 DIALS WITH POWERZONE WIRE GUIDE LACING ALLOW QUICK AND PRECISE MICRO-ADJUSTMENT WHILE MAINTAINING STABILITY.

THINK. FAST.

These two words define both our approach and the promise of the S-PHYRE brand. After all, we are from the country that invented the

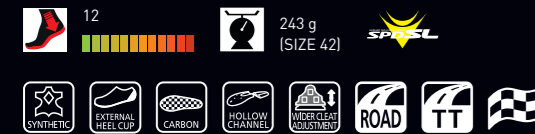

bullet train. And just like the bullet train, S-PHYRE doesn't exist because creating it is easy; it exists because it is necessary.

S-PHYRE RC9 SHOE

THE PINNACLE OF ROAD COMPETITION FOOTWEAR

Super light. Incredibly fast. Close to the action. Power transmission is job one with the new S-PHYRE road competition shoe. It connects your leg, foot, sock and shoe with a unique linkage effect that transfers every last watt while treating your toes to a comfortable fit. Because when you're suffering for glory, the last thing you want is a shoe that's not contributing to the effort.

S-PHYRE TALL SOCKS

PROFESSIONAL GRADE RACING SOCKS

All socks are the same, right? But what if a sock could make a shoe better? S-PHYRE believes it can. By looking at the shoe/sock interface and applying our Linkage Effect approach, S-PHYRE socks combine thermoregulation, comfort, ankle roll stability, and heel slip-resistance with an extra-tall cuff that's guaranteed not to droop. Asymmetrical structural weaving of proprietary fabrics provides guiderails for proper foot alignment through the entire 360-degree crank rotation. And you thought a sock was just a sock. By the way, they look great with S-PHYRE shoes, and work even better too.

- MATERIAL**
- 58% Polyamide, 34% Polyester, 8% Elastane

THE HARMONY OF DESIGN, FORM AND FUNCTION

Setting out to create a totally chamois is a challenging task. Everyone has a favorite. Everyone has an opinion.

The old way of developing ideas was seat of the pants. Fast-forward to today. Our S-PHYRE team of free-thinking engineers and passionate riders used insight, finite analysis tools, computer model and a lot of in-the-saddle testing to create the next generation of chamois performance.

SHIMANO
FUSION
CONCEPT

For more information download the SHIMANO FUSION CONCEPT App

SHAPED TO CONFORM

Our highest performance chamois is designed to move naturally with the rider. This chamois delivers on the S-PHYRE promise of more power, efficiency, and comfort.

TARGETED SUPPORT

The integrated Shock Absorption Technology is built from extensive research and real world, in-the-saddle testing. Strategically placed to provide shock neutralization and evenly distribute pressure throughout the life of the chamois.

VENTILATION MANAGEMENT

Innovative 3 mm square-shaped perforated ventilation holes were developed to ensure superior ventilation and moisture management in all conditions. TRS foam pads are lightweight and flexible.

SEAMLESS INTERFACE

Most chamois are built from the bottom up. S-PHYRE is built from the body out to provide the smoothest surface next to your skin. Shock absorbing materials are placed next to the saddle surface, eliminating chaffing and pressure points.

VARIABLE-POSITION DESIGN

The 3D contouring places thicker padding towards the sides to allow for the changing positions in climbing and descending. More comfort in more positions means all-day comfort while in the drops or on the hoods.

S-PHYRE RACING SKIN SUIT

PROFESSIONAL GRADE RACING SKIN SUIT

There is a reason pro riders use skin suits to perform at their best. Combining the bib and jersey into one piece delivers better fit, better aerodynamics, less weight, fewer seams and improved moisture management. While S-PHYRE skin suits are engineered in SHIMANO's innovation lab and tested in the wind tunnel to provide maximum resistance reduction in the riding posture, they aren't just for pro-level racers. They're for elite riders in everyday applications.

MATERIAL

- Main body: 75% Polyester, 25% Elastane
- Part: 65% Polyamide, 33% Elastane, 2% Polyester

SIZE

- EUR: XS-XXL/NA: XXS-XL/LA: PP-XG/Asia: S-XXXL

RACING CHAMOIS

SEAMLESS SHOULDERS

S-PHYRE seamless shoulders channel and straighten airflow over the front and sides of the body to reduce the drag coefficient.

LIGHTWEIGHT EFFICIENCY

Second skin fabric with advanced moisture management, improved fit, exceptional shape retention and lightweight comfort.

AERODYNAMIC EFFICIENCY

Maximum aerodynamic efficiency while in aggressive riding postures.

IMPROVED COMFORT/DRAG REDUCTION

Single-unit construction enhances comfort and reduces aero drag.

-93 SEC

THE S-PHYRE SKIN SUIT IS 93 SECONDS FASTER*

*FASTER THAN THE SHIMANO PRINT JERSEY/SHORT. OVER 40K @ 40KM/H. 10KM/H HEADWIND. 494.6 WATTS VS. 502.3 VS. 507.7 WATTS.

ONE-PIECE DESIGN

Fewer seams, more comfort, faster. The essential road, tri and cyclocross gear.

WOVEN-IN BENEFIT

Variable-density weaving structure across the skin suit maximizes temperature regulation and even delivers the tone-on-tone logo graphics in one hard-to-make, easy-to-wear, faster-than-fast piece of technical equipment.

SEAMLESS CONSTRUCTION

Seamless construction at the back of the thigh reduces friction.

ZERO-LOSS INTERFACE

S-PHYRE bib inner-thigh weaving patterns are designed to integrate with saddle edge materials for a zero-loss interface.

INTEGRATED GRIPPER

Integrated woven leg grippers hold the leg more securely, and offer increased all-day comfort over silicone applications.

S-PHYRE BIB SHORTS

PROFESSIONAL GRADE RACING BIB SHORTS

Bib shorts were originally designed for a smoother, seamless fit at the waist, but S-PHYRE shorts smooth out the entire fit across the thigh as well. The fabric is precision-knitted for compression, ventilation and moisture management.

A completely new S-PHYRE chamois has been developed for 2017. Its articulated rear section allows a freer range of motion and decreased power required to turn over the pedals. Graphics are knitted in, rather than applied, printed or sublimated. That means no hot spots. No compromise in compression. Nothing that gets in the way of fast.

S-PHYRE NEW
SUMMER BASELAYER

SEAMLESS KNIT BASELAYER DESIGNED FOR DEALING WITH PHYSIOLOGICAL PHENOMENON, AND FOR WEARING WITH OUR JERSEY AND BIB SHORTS

S-PHYRE baselayer is system engineered to work with the S-PHYRE jersey and bib shorts to help a rider maintain peak performance and core temperature through ventilation and moisture management.

Utilizing advanced seamless construction techniques, this base layer fits like a second skin to maximize the linkage effect between rider and gear, ensuring maximum aerodynamic efficiency.

MATERIAL

- Main body : 8% Elastane, 37% Polyester, 55% Polypropylene
- Elastic band Part : 60% Microfiber, 25% Lycra, 15% Nylon

SIZE

- EUR:XS/S-XL/XXL/NA:XXS/XS-L/XL/LA:PP/P-GG/XG/Asia:S/M-XXL/XXXL

OPEN-MESH VENTILATION TO PREVENT OVERHEATING

Cycling specific design and fit is optimal for warm to hot conditions.

SYSTEM ENGINEERED

Aligned heat control ventilation panels use low-pressure airflow to create a comfortable and efficient interface between the rider and the S-PHYRE jersey and bib shorts.

KNITTED CONSTRUCTION

Polypropylene and polyester are artfully knitted together to form strategic mesh panels to maximize the moisture transfer and heat ventilation capabilities of the garment, and keep the rider dry and comfortable.

SEAMLESS CONSTRUCTION

Utilizing advanced seamless construction techniques, this base layer fits like a second skin to maximize the linkage effect between rider, bib short, and jersey.

ANATOMIC FIT

A cycling-specific pattern with stretchable construction ensures proper on the bike fit without restriction or excess bulk.

S-PHYRE GLOVES

PROFESSIONAL GRADE RACING GLOVES

At SHIMANO, we know more than a little bit about how the hand-to-glove-to-shifter/hood interface should function. We know the more seamless, the better. And S-PHYRE gloves deliver more engineering and features into the palm of your hand than any glove we have brought to market. S-PHYRE gloves feature a pre-curved design for the most conforming fit possible. The softest yet most durable palm material combines with a one-piece-variable-lint panel to optimally connect your hand to the shifter/hood position. The result? Maximized feel and control in every condition.

THE RIGHT SHOE
 FOR EVERY RIDER
 AND EVERY RIDE

THE BEST
SHOE
FOR YOU,
IS THE
SHOE THAT
FITS YOU
BEST.

When we invented SPD clipless pedals more than 25 years ago, we faced one small problem: there were no compatible shoes. So we took a good, long look at the human foot, examined how it functioned in cycling applications, and created a high-performance shoe from scratch.

We design, analyze and test cycling footwear that fit our standards and the human foot. And we've discovered that a rider's foot behaves very differently when racing, mountain biking, touring, commuting or walking. In other words, one size (and one last) doesn't fit everyone.

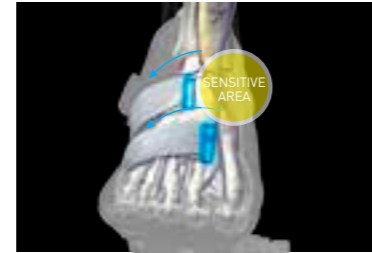

It's why we offer the widest range of footwear types, lasts, sizes and styles. Sure, it would be easier to use just one last with different uppers and colorways to create a line. But when the shoe is purpose built to fit and perform, the results are millions of happy metatarsals, tarsals, phalanges, calcaneuses, plantar fascias and taluses. That's code for happy feet.

FOOTWEAR OPTIMIZED AROUND THE HUMAN FOOT

SHIMANO footwear is developed using our unique understanding of how the foot interfaces with the shoe and pedal to optimize comfort and maximize power transfer for smooth and efficient pedaling.

ANATOMICALLY DESIGNED

All SHIMANO footwear closures are anatomically designed to reduce pressure and tension on the highest points of the foot. By wrapping the foot securely and in a uniform method, comfort is improved and added power transmission created.

OFFSET STRAPS

Unlike conventional closures, SHIMANO's anatomically precise Offset Straps relieve tension at the highest point of the foot, where pressure tends to be greatest.

CROSS-X STRAPS

Our Cross-X Strap system is built for the on-foot challenges of off-road riding with the real-world need of alleviating pressure when off the bike.

LOW PROFILE REVERSE BUCKLES

Super low-profile reverse buckle holds foot securely.

The Boa® System

BOA® | FIT TO GO FURTHER.™

The Boa® System offers infinite adjustment for glove-like fit. On-the-fly, one-handed adjustments, secure locking and fast release.

SHIMANO FOOTWEAR PROVIDES ALL-DAY COMFORT BY WRAPPING THE FOOT SECURELY TO MAXIMIZE POWER TRANSFER.

1. COMFORT

Every SHIMANO cycling shoe uses supple yet durable upper materials engineered together with our unique closure options to secure the foot firmly and comfortably without hot spots or pressure points.

2. SECURITY

Efficient power transfer demands a stiff and rigid sole that can result in heel slip. SHIMANO cycling footwear is engineered with lightweight internal or external 3D Anatomic heel cups, which secure the heel to eliminate slip and chaffing while maximizing power transfer.

EXTERNAL HEEL CUP

On select models we utilize an external heel cup for enhanced heel hold and optimal durability..

3. POWER TRANSFER

Whether it is our ultra-stiff carbon fiber DYNALAST road performance soles, rider-tuned off-road TORBAL® soles, or on and off the bike optimized city touring soles; every SHIMANO sole is designed with the specific user in mind.

EVERY RIDER DESERVES THE PRO TREATMENT

SHIMANO offers a wide variety of shoes to match a range of riding styles. For each of our shoe models, we develop soles designed to optimize the desired style of riding. For pro racers seeking maximum power transfer, we equip our competition shoes with highly rigid soles and stability-enhancing insoles. And for the casual hike-and-bike touring enthusiast, we offer shoes featuring more flexible soles and cushioned insoles to provide greater comfort for walking.

STIFFNESS INDEX

BESPOKE FIT FOR YOUR FEET

SHIMANO's CUSTOM-FIT heat-moldable insoles revolutionized cycling footwear. They feature an ergonomic, heat-moldable EVA with a rigid, high-density PE support structure and customizable arch inserts to provide instant support, comfort, and stability.

CUSTOM-FIT INSOLE MOLDING TOOL
The CUSTOM-FIT insole molding tool maintains the shape of heat-moldable insoles. Providing precise plantar shape for more power, comfort, and support.

ANTI-SLIP TOP SURFACE
Keeps your feet securely positioned and supported for pedaling efficiency.

HEAT-MOLDABLE EVA LAYER
Allows you to create insoles that fit the unique shape of your feet.

HEAT-MOLDABLE HIGH-DENSITY PE WITH DEEPER HEEL CUP
Provides excellent rigidity, stability, and support.

SNUG-FITTING HEEL CUP
Snug and stable, this newly designed heel cup serves to cradle your heel and keep it reliably in place.

MID-LOW ARCH PAD
The first of two modular arch pad options, designed to support average-to-low arches.

HIGH-MID ARCH PAD
Our second modular arch pad option, this one is designed to support an average-to-high arch.

CUSTOM-FIT PRESSURE MAPPING
CUSTOM-FIT insoles disperse pressure more evenly and support a broader area for increased all-day comfort. CUSTOM-FIT also optimizes the heel bone angle and helps secure the heel in the shoe for increased power transmission.

FURTHER, FASTER... MORE COMFORTABLE

Engineered with the endurance rider in mind, the Road Performance RP9 magically blends the advanced features and construction of our road competition footwear with the comfort and efficiency required for long days on the saddle. Supple materials surround our 3D Anatomic design to conform to the foot, transferring power seamlessly and effortlessly to the pedals.

ROAD PERFORMANCE AT EVERY LEVEL

Available Road Performance models include RP9, RP7W, RP5, RP3, RP2 and RP1 for all levels of cyclists seeking performance with comfort.

LONG DISTANCE COMFORT

All day comfort without sacrificing power transmission.

CLEAN APPEARANCE

Sophisticated aesthetic and hidden hardware routing for a clean appearance.

LIGHTWEIGHT CONSTRUCTION

Built on the Road Performance platform, the RP9 weighs just 224 grams (Size 42).

SM-SH41 CLEAT ADAPTOR

The SM-SH41 Cleat Adaptor converts any 3-hole SPD-SL shoe to mount a SPD cleat. Simple to install, the SM-SH41 allows riders to utilize the performance of a road shoe with the broad range of SPD pedals. The SM-SH41 also improves walkability with cleat protecting, durable TPU platforms.

COMFORTABLE UPPER

Supple microfiber synthetic leather with laser-cut MicroVent perforations.

THE BOA® SYSTEM

Boa® IP1 closures with hidden cable routing allows for quick and precise on-the-fly adjustability.

MULTI-LEVEL COOLING

Integrated cooling channels route air across the outsole, insole, and upper.

EXTERNAL HEEL CUP

External curved heel cup stabilizes and holds the foot firmly in place.

FOOTWEAR MOUNTAIN ENDURO

DON'T JUST PUSH THE LIMIT. REDEFINE IT.

Human feet have the right balance of flexibility and resilience to conquer all sorts of terrain. So why don't off-road cycling shoes? SHIMANO understands that aggressive trail riding and racing demands the right mix of protection, stability, and surprisingly, flex when the going gets really tough.

TORBAL (Torsional Balance) improves balance and bike control by letting the heel section accommodate some lateral movement, while optimizing pedaling efficiency at the sole/cleat interface. Flexibility better-connects the rider and pedal with what the bicycle is doing underfoot, while maintaining comfort and flexibility through all ranges of rider motion.

DURABLE CONTACT AREAS

Pedal contact areas, toe and heel boast a SHIMANO-standard blend of grip and durability.

TORBAL

TORSIONAL SOLE ALLOWS NATURAL RIDER "FLOW" MOTION

TORBAL solution provides sideways flex in the back section of the sole.

DUAL-DENSITY RUBBER SOLE

For the demanding conditions of trail-enduro mountain biking.

PROPRIETARY DESIGNED MICHELIN® SOLE

SHIMANO & MICHELIN® in collaboration have developed the new sole that combines Dual-Density Rubber & Strategic Lug Placement Pattern for better grip without compromising pedaling efficiency.

EXPANDED CLEAT-ADJUSTMENT RANGE

All trail and enduro models offer a lengthened cleat-adjustment range to support a wider variety of riders and riding styles.

Materials and features that are built to take a beating while keeping you comfortable.

ALL-SEASON COMFORT

All-season performance, comfort, and weather protection. The GORE-TEX® membrane has more than 1.4 billion microscopic pores per square cm. Each pore is 20,000 times smaller than a drop of water so that no rain can penetrate it. At the same time it is 700 times larger than a water vapor molecule, so sweat can escape. In GORE-TEX® footwear your feet always stay dry and comfortable.

RUBBER TOE CAP
Reinforced rubber toecap provides durable protection.

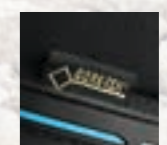

VIBRAM® OUTSOLE
Superior grip and stable footing in all conditions.

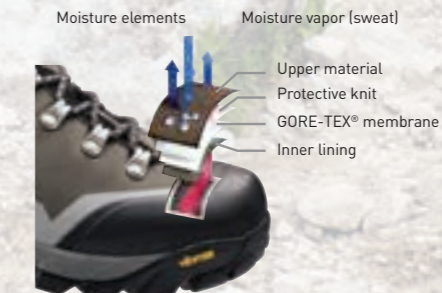

ENHANCED CLOSURE SYSTEM
Metal hook and lacing eyelet for secure lacing combined with the Mini Power Strap secures your foot to the insole.

MID-TOP DESIGN
Added stability, ankle protection, and walking support.

GORE-TEX®
Performance Comfort technology offers optimized climate comfort.

WOMEN

FOOTWEAR

PURPOSEFUL DESIGN WITH CURVE APPEAL

SHIMANO women's lasts and 3D design are specifically tailored around the exacting needs of a women's foot. We know women want cycling footwear that delivers all the performance as the men's counterpart, yet with the style and fit specifically designed for female riders. And that's exactly what SHIMANO delivers.

PERFORMANCE PLUS STYLE

The RP7W sets the benchmark for what SHIMANO Women's footwear program delivers. Performance, style, comfort, and efficiency.

TOP OF THE LINE

The new RP7W is our women's specific flagship road endurance cycling shoe.

HIGH-PERFORMANCE

Road endurance specific ultra-light carbon composite outsole with Stiffness Level 9.

COMFORT FIT

Supple synthetic leather with perforated venting for superior comfort.

ULTRA LIGHTWEIGHT

Lightweight efficiency, only 217 grams (Size 40).

EXTERNAL HEEL CUP

External curved heel cup stabilizes and holds the foot firmly in place.

THE BOA® SYSTEM

Micro-adjust Boa® L6 dial with hidden wire guides.

THE PEDAL SYSTEM
 THAT CHANGED
 CYCLING FOREVER

POWER TO THE PEDAL

At SHIMANO, "Power to the Pedal" is not a catch phrase, it's an obsession. Footwear and pedals designed together and engineered as a system, create a holistic outcome. Our pedal engineers collaborate with footwear experts to create the only shoe and pedal combination designed from the ground up to perform for each rider and their unique demands.

And true to SHIMANO's System Engineering philosophy, each combination of footwear and pedals — from SPD-SL, SPD, and CLICK'R, to the Platform Series — offers optimized biomechanics, engineering excellence, material selection, and craftsmanship to increase rider efficiency and confidence.

SPD-SL

POWER TRANSFER AND PEDALING EFFICIENCY PROVEN BY WORLD-CLASS RACERS

The SPD-SL pedal system delivers a seamless shoe + pedal interface for more efficient power transfer under extreme pedaling loads, with a wide cleat design for stability on or off the bike.

EXTRA-WIDE PLATFORM

The extra-wide platform dramatically expands the contact point between the cleat and pedal providing a solid connection when standing on the pedals.

SPRING TENSION ADJUSTMENT

SPD-SL pedals support three different ranges of spring-tension adjustment. Standard, Light Action, and Wide settings allow an optimal range to suit your individual preference and usage situation.

SPD

WALK AND RIDE PERFORMANCE FOR EVERY CONDITION

SPD delivers greater efficiency, increased stability, and added comfort both on and off the bike in the most challenging conditions, while recessed cleats make walking easy.

ADJUSTABLE ENTRY AND TENSION RELEASE

Adjustable tension allows the cleat to be set to each rider's preference.

MUD-SHEDDING DESIGN

An open-binding mechanism and refined axle-body housing allows mud and debris to be pushed out when the rider steps in.

CARTRIDGE SPINDLE BEARING UNIT

A cartridge bearing unit seals out dirt and moisture and greatly reduces the need for maintenance.

DURABLE, RELIABLE SHIMANO CONSTRUCTION

Off-road pedals must be able to take a hammering which is why SPD pedals achieve the ideal balance between lightweight, durability, and reliability.

PLATFORM

BUILT FROM THE GROUND UP FOR THE DEMANDS OF GRAVITY RIDERS

SHIMANO Platform pedals are engineered to deliver the DH, Park, or Trail rider the ideal balance of connection to the bike, pedaling stability, and on and off the bike freedom.

GRIP FOR AGGRESSIVE RIDING

Pedal body shape and stainless steel pin placement ensure riders have a direct and secure connection to the pedal, maximizing both control and pedaling efficiency.

OPTIMIZED PEDAL PLATFORM SIZE

M828 SAINT and M8040 DEORE XT pedals feature a concave surface (lower in the center and higher in the front/rear) to further enhance shoe to pedal interface and grip. Adjustable pins offer even more connection.

WEIGHT AND DURABILITY

Materials, construction, shape, and thickness are all carefully considered to engineer a platform pedal with the best balance of lightweight, low Q-Factor, and durability across riding conditions.

CLICK'R

ALL THE BENEFITS OF BEING CLIPPED IN, WITH EASY ENTRY AND RELEASE

CLICK'R pedals are ideal for any cyclist that wants SPD efficiency with a more user-friendly interface.

SHOES AND PEDALS DESIGNED TOGETHER

SHIMANO City and Mountain Touring Shoes feature a unique ladder-shaped "shank" plate. Together with our simple to use pedal, this ensures correct placement of a rider's ball-of-the-foot to transmit power to the pedal.

EASY IN, EASY OUT

This system utilizes a refined recessed SPD cleat, which works with our CLICK'R pedals to transform comfortable walking shoes into a simple-to-use power transfer system.

ROAD

SPD-SL

SPD-SL/PD-R8000

The PD-R8000 brings the technologies from our flagship PD-R9100 to the ULTEGRA level. Its lightweight composite body, with integrated contact plates lowers the overall weight to just 248 grams — 14 grams less than the PD-R6800 it replaces. A sleek package that delivers competition-level performance to the road performance rider.

ULTEGRA PERFORMANCE

Pro level performance for the enthusiast road rider.

LIGHTWEIGHT

Lightweight, yet durable design weighs only 248 grams.

EXTRA WIDE PLATFORM

Wide platform delivers efficient power transfer and stability.

INTEGRATED CONTACT SURFACE

Durable integrated stainless body plate reduces weight, flex, and wear.

WIDE BEARING STABILITY

Wide bearing placement for stable and uniform load distribution.

PLUS 4 MM AXLE OPTION

Offered in two axle lengths, normal and +4 mm.

RIDER ADJUSTABLE

Adjustable entry and release tension settings adjust to rider preferences.

DURA-ACE

PD-R9100

THE LIGHTEST, MOST EFFICIENT DURA-ACE PEDAL EVER CREATED

FEATURES

- Optimized balance of weight and rigidity
- Injection-molded carbon-composite body
- Extra-wide platform for stability and power transfer
- Wide bearing placement for uniform load distribution
- Customize the entry and release tension settings
- SHIMANO 3-year limited warranty
- 4 mm longer axle model available

SHIMANO ULTEGRA

PD-R8000 NEW

LIGHTWEIGHT, PRO LEVEL PERFORMANCE FOR THE ENTHUSIAST RIDER

FEATURES

- Lightweight carbon-composite body
- Extra-wide platform for a more efficient transfer of power
- Durable stainless steel body plate reduces flex and pedal body wear
- Wide bearing placement for stable, uniform load distribution
- Adjustable entry and release tension settings
- 4 mm longer axle available

SHIMANO 105

PD-5800

FROM CLUB RIDING TO SERIOUS RIDING

FEATURES

- Carbon-composite body
- Extra-wide platform for maximum efficient transfer of power
- Durable stainless steel body plate reduces flex and pedal body wear
- Wide bearing placement for stable, uniform load distribution
- Customize the entry and release tension settings
- The SHIMANO style, quality and durability cyclists value

BLACK PD-R550

GRAY PD-R550

PD-R550

WIDE SPRING TENSION ADJUSTMENT RANGE FOR A WIDE RANGE OF RIDERS

FEATURES

- Wide spring tension adjustment range
- Larger entry target for easier engagement
- Composite body
- Extra-wide platform for maximum efficient transfer of power
- Durable stainless steel body plate reduces flex and wear
- Wide bearing placement for stable, uniform load distribution
- The legacy of SHIMANO design, quality and performance

WHITE PD-R540

BLACK PD-R540

SILVER PD-R540

PD-R540

PROVEN PERFORMANCE ON THE RACE COURSE

FEATURES

- Wide platform for a more efficient transfer of power
- Wide bearing placement for stable, uniform load distribution
- Low maintenance sealed cartridge axle unit
- Customize the entry and release tension settings
- The legacy of SHIMANO design, quality and performance

WHITE PD-R540-LA

BLACK PD-R540-LA

PD-R540-LA

LIGHTEST ACTION PEDAL FOR RIDERS THAT DEMAND SPD-SL EFFICIENCY

FEATURES

- Lighter spring action version of PD-R540
- Wide platform for a more efficient transfer of power
- Wide bearing placement for stable, uniform load distribution
- Low maintenance sealed cartridge axle unit
- Customize the entry and release tension settings
- The legacy of SHIMANO design, quality and performance

SPD OFF-ROAD

SPD/PD-M820

SHIMANO SPD pedals have earned the top spots on the podium and in the minds of cyclists for more than 25 years. Hundreds of thousands of professional, amateur, and recreational racers and riders have trusted SHIMANO to deliver reliable performance in every condition. The PD-M820 takes its place as the downhill pedal that sets the standard for better bike control.

WIDE CONTACT AREA

Wide contact area for stable interface with SHIMANO AM series footwear.

LOW PROFILE

Thinner pedal body for lower stack height and less chance to contact obstacles.

ADJUSTABLE PINS

Four height-adjustable pins on each platform for a more secure grip when not clipped-in.

DURABLE AND STRONG

Slim yet durable chrome-moly spindle with 8 mm hex-wrench mount.

SIMPLE AND DURABLE

Non-pop-up alloy body for simplicity and durability plus protects binding mechanism from impacts and damage.

DESIGNED TO WORK TOGETHER

Matches the SH-AM901 shoe.

PD-M9000

ULTIMATE POWER TRANSFER MATCHED WITH LEGENDARY INGENUITY AND RELIABILITY

FEATURES

- Wide pedal-to-shoe contact area
- Wider bearing placement for increased rigidity
- Slimmer, lighter axle
- Low platform height for pedaling stability
- Oval shape axle body housing for smoother mud & debris flow
- Slimmer axle unit increases open space between bindings

PD-M9020

INSPIRED TO TACKLE SINGLE TRACK AND TECHNICAL DESCENTS WITH CONTROL AND CONFIDENCE

FEATURES

- Extremely wide pedal-to-shoe contact area
- Wider bearing placement for increased rigidity
- Increases stability and control when not clipped in
- Protects binding mechanism against impacts
- Oval shape axle body housing for smoother mud & debris flow
- Slimmer axle unit increases open space between bindings

PD-M8000

XC RACE PEDALS OPTIMIZED FOR MAXIMUM POWER EFFICIENCY

FEATURES

- Large pedal platform
- Mud shedding offset binding design
- Lower platform height for pedaling stability
- Robust retention claws provide smooth engagement and release
- Customize the entry and release tension settings
- Strong, durable chrome-moly spindle with 8 mm hex wrench mount

PD-M8020

TRAIL AND ENDURO PEDALS ENGINEERED TO ENHANCE BIKE CONTROL

FEATURES

- Wide pedal-to-shoe contact
- Lower platform height for pedaling stability
- Integrated cage increases stability and control when not clipped in and protects binding mechanism against impacts
- Robust retention claws provide smooth engagement and release
- Customize the entry and release tension settings
- Strong, durable chrome-moly spindle with 8 mm hex wrench mount

SILVER PD-M540

BLACK PD-M540

PD-M540

OPEN BINDING MECHANISM AND LIGHTWEIGHT FOR SERIOUS OFF-ROAD COMPETITORS

FEATURES

- Classic SPD reliability and performance
- Customize the entry and release tension settings
- Better mud and debris shedding than any pedal in its class
- Chrome-moly spindle and low-maintenance sealed bearing cartridge axle

WHITE PD-M530

BLACK PD-M530

PD-M530

CLASSIC SPD RELIABILITY AND PERFORMANCE WITH AN OVERSIZED PLATFORM

FEATURES

- Integrated cage increases stability and control when not clipped in and protects binding mechanism against impacts
- Better mud and debris shedding than any pedal in its class
- Customize the entry and release tension settings
- Low-maintenance sealed cartridge axle

SILVER
PD-M520

WHITE
PD-M520

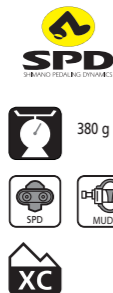

BLACK
PD-M520

PD-M520

CLASSIC SPD RELIABILITY AND PERFORMANCE PERFECTED FOR MTB OR ROAD CYCLISTS

FEATURES

- Compact body design with open binding for easy-entry
- Better mud and debris shedding than any pedal in its class
- Customize the entry and release tension settings
- Chrome-moly spindle and low-maintenance sealed bearing cartridge axle

PD-M820 NEW

SAINT-LEVEL SPD PEDAL FOR AGGRESSIVE DOWNHILL/ENDURO RIDERS

FEATURES

- Wider contact area enhances stability in combination with AM shoes
- Thinner pedal body for lower stack height and improved obstacle clearance
- Non-pop-up alloy pedal body for simplicity and durability
- Durable, yet slimmer chrome-moly spindle with 8 mm hex wrench mount
- Four height adjustable pins per side for improved grip when not clipped-in
- Pedal body protects binding mechanism against impacts

PD-M647

DESIGNED FOR THE RIGORS OF EXTREME RIDING AND BMX RACING

FEATURES

- "Pop-up" mechanism tilts the binding at a 12.5° angle for easy and fast entry
- Customize the entry and release tension settings
- Excellent mud and debris shedding ability
- Chrome-moly sealed cartridge spindle with reinforced steel collar

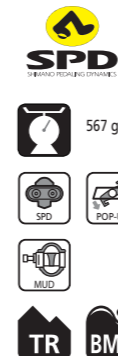

PD-M545

DURABLE AND VERSATILE TO TAKE ON NEARLY ANYTHING

FEATURES

- "Pop-up" mechanism tilts the binding at a 12.5° angle for easy and fast entry
- Heavy-duty aluminum body and cages
- Chrome-moly spindle and low-maintenance sealed bearing cartridge axle
- Customize the entry and release tension settings

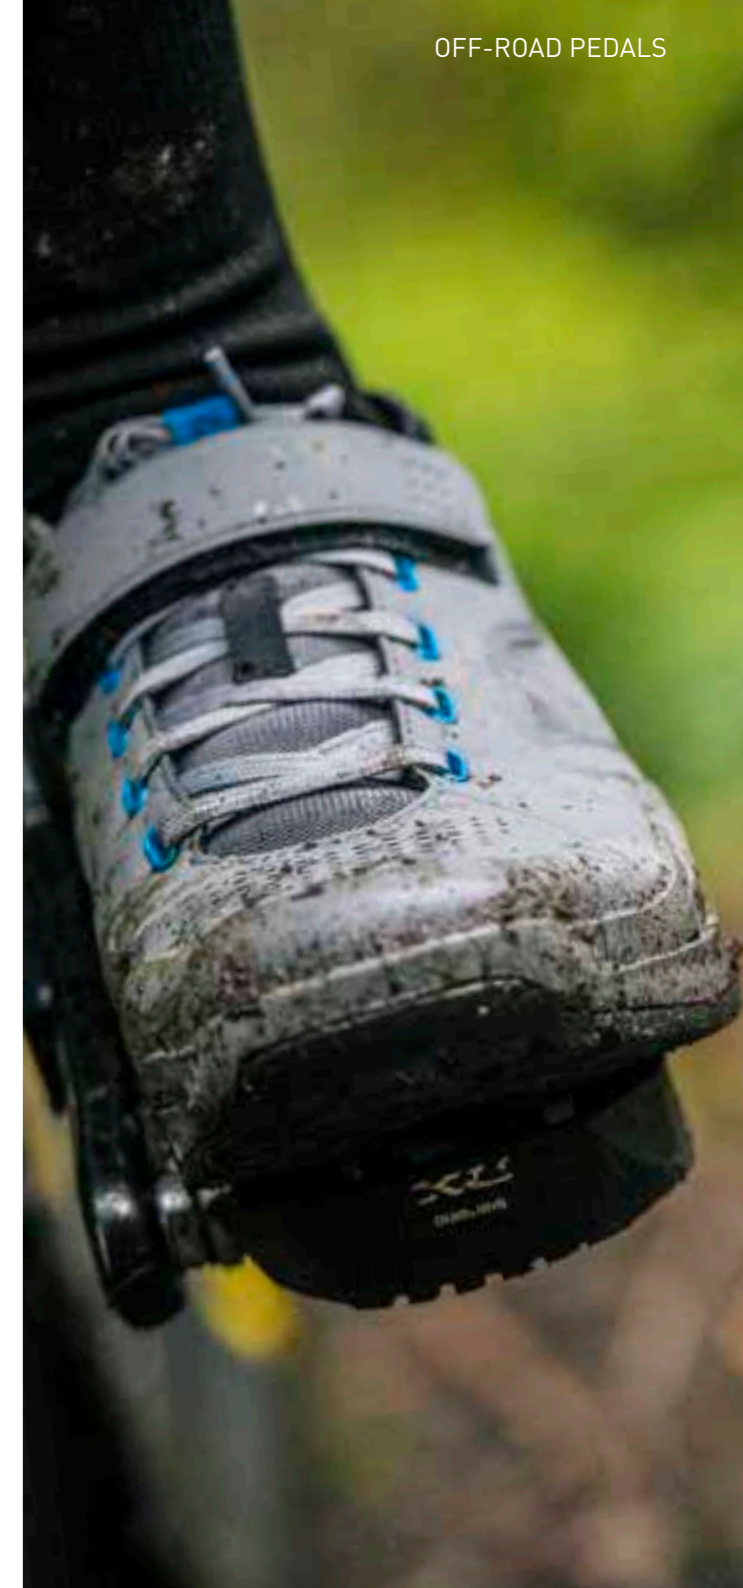

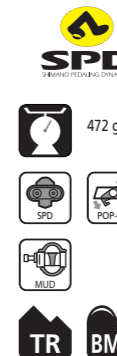

PD-M424

VERSATILE PLATFORM IS GREAT FOR MOST STYLES OF CYCLING

FEATURES

- "Pop-up" mechanism tilts the binding at a 12.5° angle for easy and fast entry
- Large high-impact resin cages
- Chrome-moly spindle and low-maintenance sealed bearing cartridge axle
- Customize the entry and release tension settings

PLATFORM/PD-M828

Experienced and aggressive off-road riders are now looking for pedal options based on the specifics of the ride type, trail, and weather conditions. The SHIMANO platform pedal line is designed to deliver the same performance, quality, and durability that riders around the globe expect from SHIMANO.

OFF ROAD VERSATILE

For trail and downhill, SHIMANO platform pedals offer durability and quality.

OUR BENCHMARK FLAT PEDAL

The PD-M828 is the pinnacle flat pedal line.

SAINT LEVEL PERFORMANCE

Saint level construction and details include a 1 mm fore-aft concave on each side, virtual concave with 5 mm pins at front and rear, 3.5 mm pins at center.

DESIGNED TO WORK TOGETHER

The shoe-to-pedal interface is even more important with a flat pedal. SHIMANO is the only system engineered solution that delivers platform footwear and pedals developed to work as one with the SH-GR900 shoe.

PLATFORM
OFF-ROAD

PD-M828 NEW

NEW SAINT-LEVEL FLAT PEDAL WITH SUPERIOR GRIP, SUPPORT, AND DURABILITY

FEATURES

- Concave platform with "virtual concave" height adjustable pins
- Wide platform for more support and grip
- 12 pins per side with option of long or short pins
- Durable, yet slimmer chrome-moly spindle with 8 mm hex wrench mount

PD-M8040-ML

PD-M8040-SM

PD-M8040 NEW

NEW TRAIL-OPTIMIZED FLAT PEDALS WITH LEGENDARY PERFORMANCE AND DURABILITY

FEATURES

- Two size options (SM and ML) for optimized support and pedaling efficiency
- Concave platform for enhanced grip, long ride comfort, and efficiency
- 10 pins per side with option of long or short pins
- Strong, durable chrome-moly spindle with 8 mm hex wrench mount
- SM : 100 mm x 105 mm for 36 - 44 GR shoe/ML : 110 mm x 115 mm for 43 - 48 GR shoe

BLACK PD-GR500

SILVER PD-GR500

PD-GR500 NEW

DURABLE FLAT PEDAL OFFERS VERSATILITY ACROSS TERRAIN AND RIDING STYLES

FEATURES

- Concave platform for better grip, long-ride comfort, and efficiency
- Height adjustable, bottom-loading replaceable pins
- Chrome-moly spindle and low-maintenance, sealed bearing cartridge axle

EXPLORESER SPD PEDALS

PD-ED500/ ROAD TOURING PEDAL

The PD-ED500 double-sided, light-action SPD is designed for rides requiring frequent engagement and disengagement, such as City Touring. Light-action springs allow for easy entry and exit making the new rider feel more confident. Two-sided entry makes clipping-in easier without the need to flip the pedal or look down.

CLEAN APPEARANCE

The PD-ED500 features a clean appearance body for use on lightweight road touring bikes.

EASY RIDER ADJUSTMENT

Easy-to-adjust entry and release tension settings.

LIGHT ACTION

Easy entry with narrow release is designed for City Touring use.

LOW-MAINTENANCE

Low-maintenance sealed cartridge bearings.

DURABLE PERFORMANCE

Chrome-moly spindle for long service life.

SAFE AND SECURE

Included SM-SH56 multi-directional cleats.

SYSTEM ENGINEERED TO WORK TOGETHER

SHIMANO CT and RT footwear are designed to match for the PD-ED500.

PD-ED500 NEW
 LIGHT ACTION, EASY IN AND OUT SPD ROAD TOURING PEDAL

- FEATURES**
- Double-sided light action SPD pedal design aids frequent entry and release.
 - Adjustable entry and release tension settings
 - Chrome-moly spindle and low maintenance sealed bearing cartridge axle
 - SM-SH56 (multi-directional release cleat) included

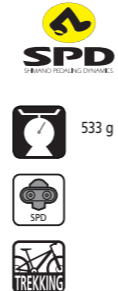

PD-T8000
 HIGH-QUALITY DUAL PLATFORM PERFORMANCE FOR TOURING, TREKKING AND COMMUTING

- Two-sided flexibility and performance
- Customize the entry and release tension settings
- Only 392 grams
- Concave cleat clearance on platform side
- High-grip pins
- Sealed cup and cone bearings

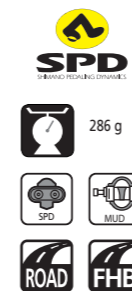

PD-M324
 VERSATILE SPD PEDAL FOR ENTRY-LEVEL USERS, GREAT FOR EVERYDAY CYCLING

- Combines the efficiency of the SPD system and the convenience of a platform pedal
- Customize the entry and release tension settings
- Sealed mechanism and serviceable cup & cone bearings

PD-A600 NEW COLOR
 PREMIUM ROAD SPD PEDAL

- Lightest ever SPD pedal at ULTEGRA level
- Wide platform for more efficient transfer of power from SPD shoes

RIDER-TUNED FIT

SHIMANO FUSION CONCEPT offers fit profiles for every cycling need.

1. TIGHT FIT TO DELIVER IMPROVED AERODYNAMICS

Air resistance is the enemy of every rider. The better the fit, the easier you slice through the air and the fewer watts you use. We use aerodynamically superior materials at key frontal areas to streamline the rider/airflow interface.

2. SLIM FIT FOR THE RIGHT BLEND OF PERFORMANCE AND COMFORT

SHIMANO uses engineering, meticulous research, and extensive testing to ensure that our fit profiles fit your specific needs.

3. COMFORT FIT FOR SPORTS-MINDED CYCLISTS

When you have logged as many miles as our global test teams, you know what it takes to build products that fit and perform flawlessly.

4. TOUR FIT, ENGINEERED FOR MAXIMUM COMFORT AND FREEDOM IN ALL CONDITIONS

We conduct rigorous lab tests to pursue the ultimate in quality, comfort and durability. After all, would you expect any less from SHIMANO?

ADVANCED CHAMOIS TECHNOLOGY IS MAGIC

With a solution for every type of riding, our men's and women's specific Italian-made chamois utilize the most advanced materials and fabrics, and are seamlessly molded using cutting-edge construction methods.

3D ANATOMIC DESIGN

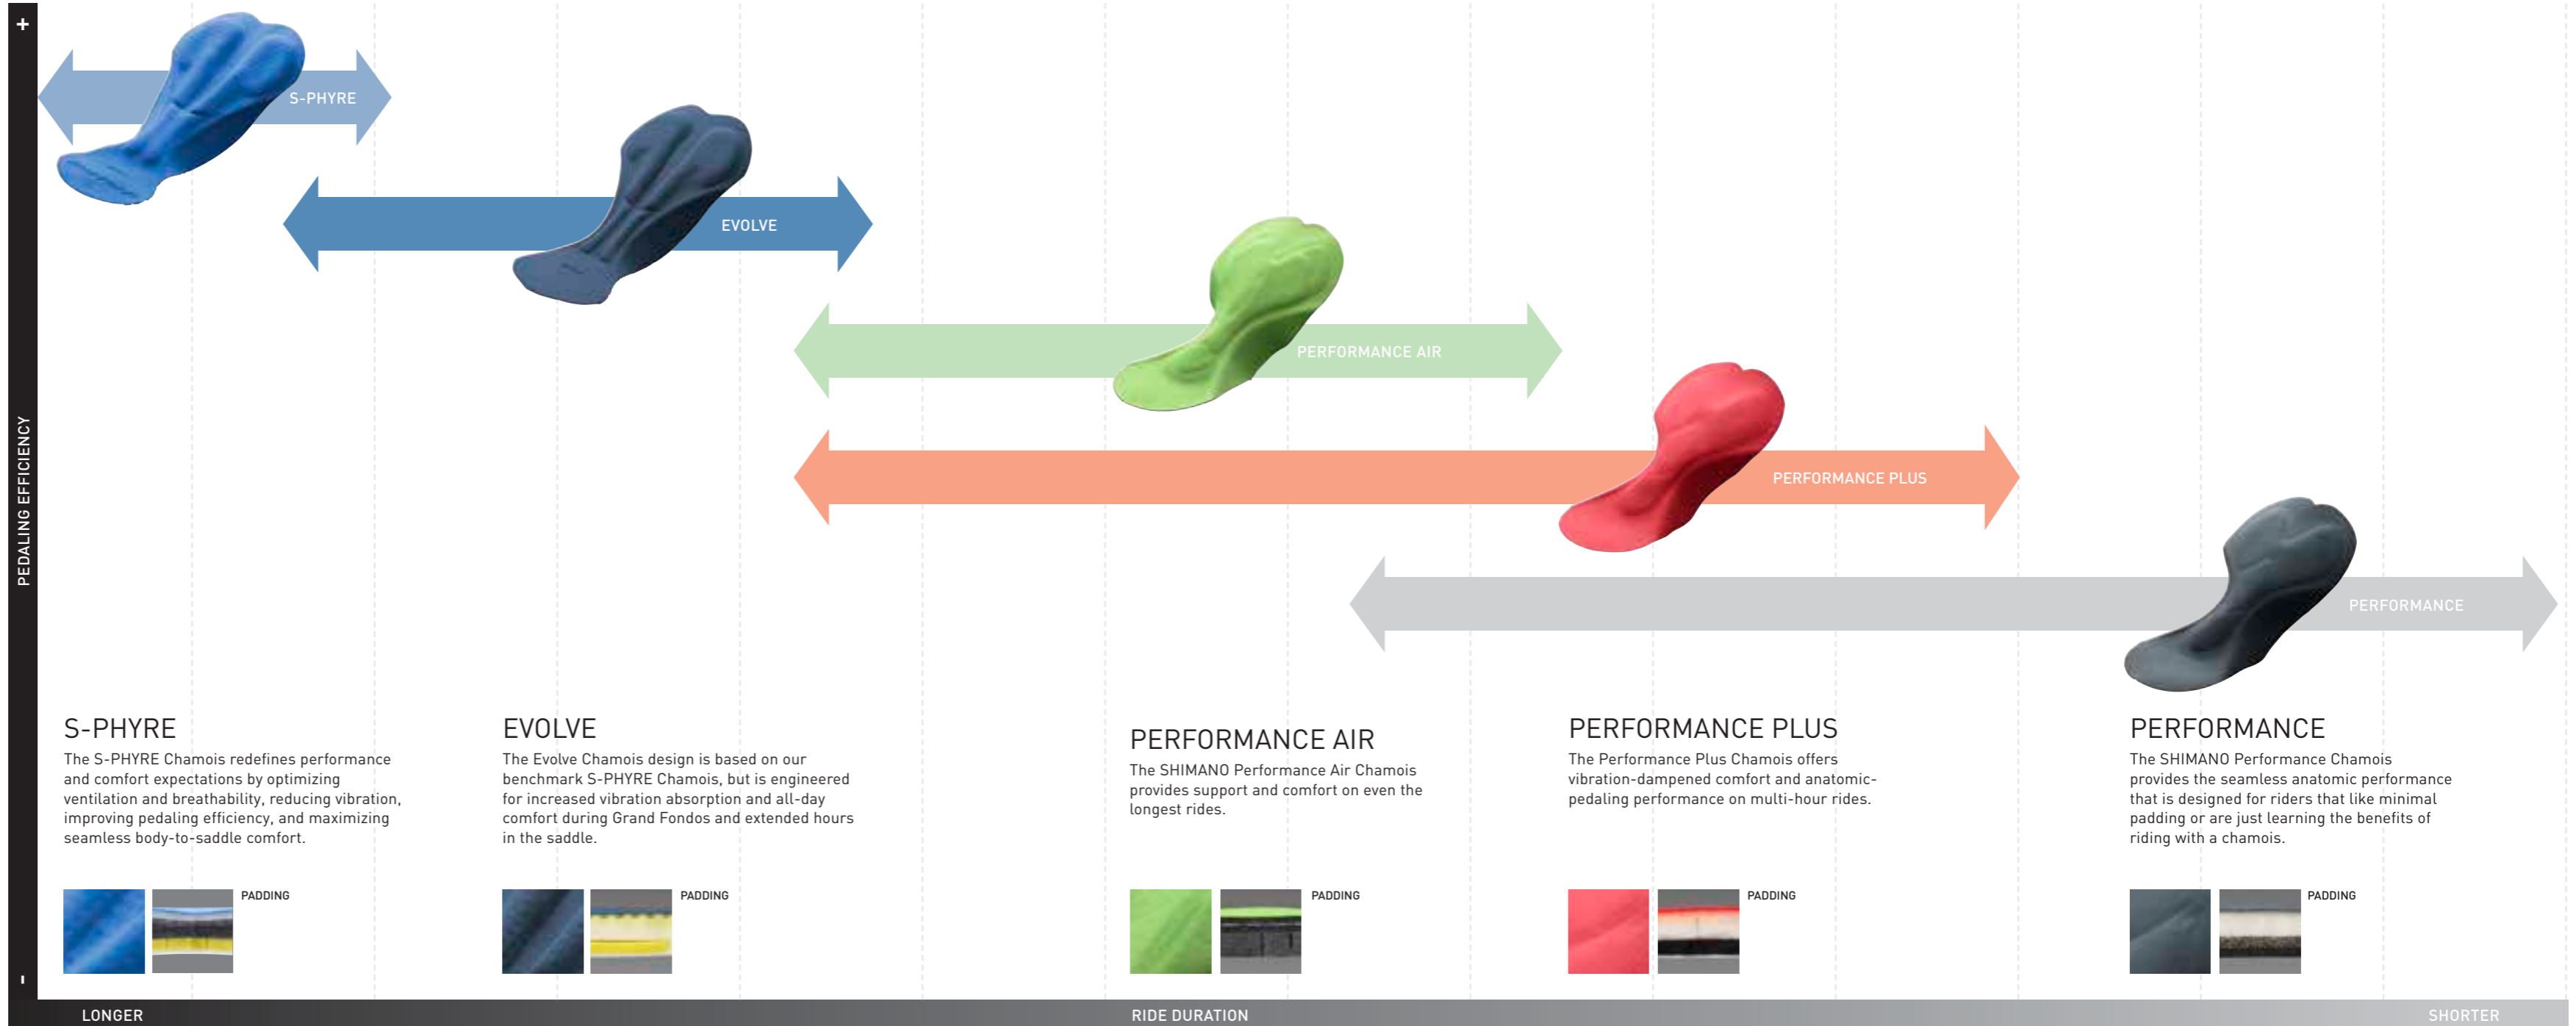

Body conforming shapes deliver on-the-bike comfort and natural pedaling performance. 3D contouring places thicker padding in strategic areas for changing rider positions. Body-out design ensures the most comfortable ride.

TARGETED SUPPORT

Strategic padding placement neutralizes shock and vibration, evenly distributes pressure, and eliminates chafing.

VENTILATION AND BREATHABILITY

Rider-specific padding perforations empower ventilation and moisture management. Soft surface fabric with texture improves next to skin ventilation and transfers moisture away from the body.

PRECISELY THE RIGHT MATERIALS IN EXACTLY THE RIGHT PLACES

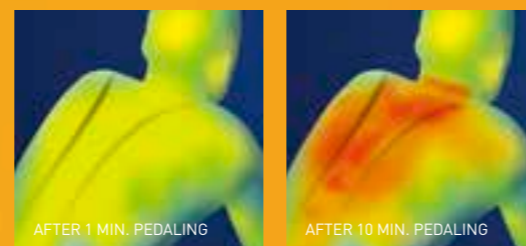

SHIMANO FUSION CONCEPT Spring/Summer products are crafted from the most advance technical fabrics available. Each material is selected based on the specific performance characteristics required by the rider and the riding conditions.

Our Heat Control Ventilation panels use natural airflow to pull heated air from the back, the largest heat sink on the body.

Advanced construction techniques and innovative design creates garments with fit, comfort, and performance seamlessly integrated together.

SUMMER RIDING TEMP SIMULATION

Laboratory simulations reveal as much as a 6.5°C rise in skin surface temperature in as little as 10 minutes. By using this area where sweat naturally pools, SHIMANO helps riders maintain performance level longer on warm-to-hot days.

+6.5°C INCREASE THERMOGRAPHIC TEST RESULT (SKIN TEMPERATURE)

VENTILATION THAT'S GOT YOUR BACK

Strategically placed, highly breathable back panels promote sweat evaporation and heat release, keeping the rider cool even when the mercury rises.

INSIDE OUT JERSEY REVEALS FABRIC CONSTRUCTION

DRY TOUCH CONSTRUCTION

The unique dual-layer Dry Touch construction keeps moisture away from the rider. 2 in 1 construction acts like a built-in baselayer keeping the rider cool and comfortable without the added bulk.

MOISTURE MANAGEMENT

We use only the high-quality fabrics to pull perspiration away from the skin and quickly move it to the outer surface of the garment where it can evaporate, keeping the rider cool and comfortable even during high exertion periods.

UV PROTECTION

Not just for when the sun is shining, UV protection is needed even on overcast days. SHIMANO apparel is engineered to limit exposure to harmful ultra-violet rays, keeping the rider comfortable.

INTEGRATED VENTILATION

Strategically placed panels, MicroVents and MacroVents are lightweight and aerodynamic ways to bring in cooling air, and to allow excess heat and moisture vapor to escape.

THE FUSION OF PERFORMANCE, COMFORT, AND EFFICIENCY

The starting point of SHIMANO FUSION CONCEPT has always been to enhance the overall rider experience. We integrate System Engineering, design, and our knowledge of rider needs to create on-the-body products that maximize rider performance, comfort, and efficiency.

Highlights of the apparel category include the Evolve line of products that deliver further and faster; a re-focused Breakaway Series; and a family of jerseys specifically for hot-condition riding. SHIMANO FUSION CONCEPT Spring/Summer products offer a full line of apparel and accessories that delivers performance at every turn.

FURTHER... AND FASTER

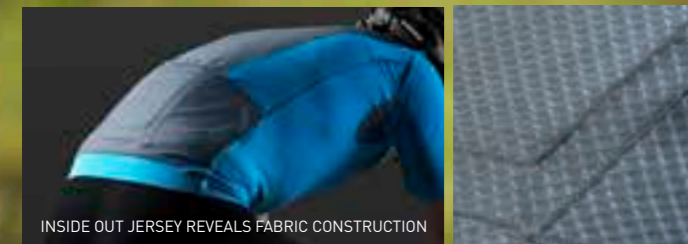

For those who seek greater challenges and endeavor to ride further and faster, we have created the Evolve Line within our Performance Collection. Focusing on delivering long-distance efficiency and comfortable performance with sophisticated styling, Evolve integrates elegant design with integrated technologies and hidden features. Soft yet durable fabrics, integrated temperature regulation technology, a 3D Anatomic Evolve Chamois, and discreet visibility combine to deliver performance, efficiency, safety, and refinement for riders that seek the horizon — quickly.

ELEGANT FINISH DETAILS

Evolve Bib Short features ribbon-style shoulder straps and gripper-free laser-cut hem for lightweight comfort. Jersey features low-profile laser-finished hems to hold without added binding, silicone, or stitches.

DRY TOUCH CONSTRUCTION

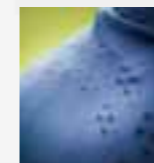

The unique dual-layer Dry Touch construction keeps moisture away from the rider. 2 in 1 construction acts like a built-in baselayer keeping the rider cool and comfortable without the added bulk.

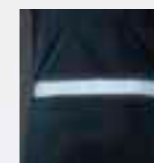

INSIDE OUT JERSEY REVEALS FABRIC CONSTRUCTION

LUXURIOUS FEEL

A luxurious "soft touch" outer fabric works with the mesh inner surface to keep the fabric from clinging to the skin during prolonged excursion.

INTEGRATED COOLING VENTS
MicroVents at the chest, armpits, and shoulders are an aerodynamic and lightweight way to increase airflow in critical areas.

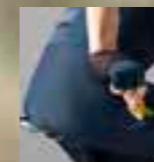

DISCREET REFLECTIVITY SAFETY
Discreet Reflectivity elements are positioned in critical areas to alert motorists in low light or night riding situations.

DRY MESH BIB
Evolve Bib Shorts are constructed with a quick-drying open-mesh bib panel for maximum cooling and comfort against the skin.

EVOLVE CHAMOIS
The Evolve Chamois is based on the benchmark S-PHYRE Chamois. Engineered for increased vibration absorption and comfort during Grand Fondos and Centuries.

HIDDEN POCKET
An integrated compartment is engineered to hold used supplement wrappers on long rides.

HOT CONDITIONS JERSEYS

SHIMANO FUSION CONCEPT Hot Weather Solutions harness the latest technical fabrics and constructions, and feature active and passive ventilation and high-performance moisture management to keep riders cool, even when the competition and weather heat up.

REFLECTING THE SUN'S RAYS

MIRROR COOL JERSEY

A yarn filled with ceramic polymer reflects the sun's rays to keep the surface temperature from rising. Xylitol more effectively produces cooling effect. Compared to conventional fabric, this advanced fabric remains 4°C cooler. Ideal for high-speed cycling under the blazing sun.

HEAT REFLECTION + COOLING EFFECT = "SUPER COOL"

ALL-OVER MESH

CLIMBER'S JERSEY

With mesh fabric in all of its panels, this jersey is officially the coolest model for summer. Great for big hill climbs in the sun and humid days.

MAXIMIZED AIR COOLING

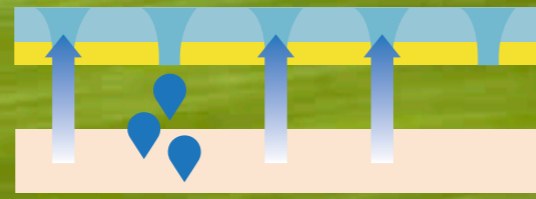

SUSTAINED COMFORT

ESCAPE JERSEY

This jersey incorporates an advanced fabric with surfaces featuring indented concave-convex pattern. The convex surface non-absorbent fiber keeps the skin dry, while the concave areas employ an absorbent fiber that takes in perspiration and disperses it for quick drying.

ADVANCED BIB SHORTS

Anatomic seams and elastic fabric ensure smooth hip movement and provide relaxed and stress-free comfort.

Following extensive fabric elasticity tests, SHIMANO has developed a new material that requires 50% less power to extend to 100% in the lengthwise direction. As a result, our Advanced Bib Shorts offer improved pedaling efficiency and power.

EVEN MORE COMFORT

Softer and even more flexible material increases pedaling elasticity while retaining the support required for comfortable power transmission.

GRIPPER-FREE DETAIL

Gripper-free seams allow thighs and muscles room to expand and contract naturally during intense rides.

SEAMLESS INNER THIGH PATTERN

Seamless thigh construction offers smoother movement and provides long ride comfort.

SHIMANO PERFORMANCE AIR CHAMOIS

The SHIMANO Performance Air Chamois provides support and comfort on long rides and doesn't break down after years of service.

YOUR COMMUTER KIT SHOULDN'T COST MORE THAN A BIKE

Commuting gear needs to handle very specific challenges. It must be versatile because the weather in the morning and evening can be very different. It needs to be ventilated and odor resistant because nobody wants to come to a showerless office covered in sweat. And, it should be reflective because work hours and daylight don't always align.

All those features can end up costing a lot. That is exactly where SHIMANO Rain Gear shines — all the quality, features, and functionality you need, in a system you can afford.

HEAD TO TOE, GLOVES TO SOCKS, WE'VE GOT YOU COVERED

Gloves, socks, and headwear are often referred to as accessories, yet we see these items as absolute necessities to the riding experience.

We place as much emphasis on designing the 3D Anatomic patterning of a glove as we do into the ergonomics of our Shift and Brake levers. We apply similar thinking to how socks work as an integrated component of the foot-to-shoe-to-pedal system interface.

SHIMANO FUSION CONCEPT is where accessories become necessities, and where no detail is too small to be improved and optimized.

NEW FOR 2018:

01. S1100X H2O SHOE COVER/02. SUN BLOCK ARM WARMERS/
03. TRANSIT LONG GLOVES/04. ORIGINAL TALL SOCKS/
05. SUN BLOCK LEG WARMERS/06. S2100D SHOE COVER/
07. LINER SHORTS/08. EVOLVE GLOVES

CONNECTING THE BIKE AND RIDER.

Gloves are a critical interface between rider and bike. SHIMANO applies the same System Engineering methodology used to develop our braking and control systems to designing and crafting our gloves. This unique perspective ensures we incorporate the right 3D Anatomic design with the correct material and padding for every type of rider and every type of ride.

DIRECT FEEL

Each one of our glove models was designed with the unique requirements of its intended usage in mind. The goal: to minimize the gap between rider and bike for a more natural riding experience.

JOINTLESS BRAKE HOOD
Seamless brake hood panels bring your hands closer to the shifters, providing more comfortable and natural control.

STRATEGIC PALM CONSTRUCTION
Palm thickness and materials are tailored to the demands of each riding style.

BIKE CONTROL

We have expanded our FLEXION FREE concept to improve bike control for a wider range of riders. Our new FLEXION FREE comfort concept provides the same stable closure system and wide wrist opening as our FLEXION FREE race, but with the added flexibility and wrist motion suitable for longer, more casual rides.

FLEXION FREE V-SHAPED OPENING
Wide "V" opening allows freer range of wrist motion and easy removal.

FLEXION FREE COMFORT
Compression structure for superior fit.

FLEXION FREE

WRAP-AROUND DESIGN

FLEXION FREE provides secure wrap-around closure that improves the fit across the palm.

EASE ON, EASE OFF
On the Classic and Original models feature Easy Pull Tabs.

FLEXION FREE EXTRA COMPRESSION STRUCTURE
A tighter, more stable fit for more direct control of the bike.

MODELS
ADVANCED GLOVES

FLEXION FREE COMFORT FLEX
A soft and comfortable fit that ensures smooth wrist motion in any position.

SOCKS

SOCK TECHNOLOGY

A sock is not just a sock when it's a SHIMANO cycling sock. SHIMANO engineers comfort and performance into every sock in our line. True to our System Engineering philosophy, we look at socks as another piece of the interconnected system that puts power to the pedal as it keeps the rider's feet comfortable.

CUSHION

Cushioning on top of the foot is engineered to protect against impacts and pressure on the top of the foot.

ARCH PANEL

This section of the sock helps to keep the arch of the foot raised to prevent fatigue.

VENTILATION

Mesh knitting enhances ventilation to keep your feet dry and comfortable.

3D LR

Anatomically designed construction with distinct left and right shapes to uniquely match the contours of each foot.

FEATURES

REFLECTIVE DETAILS
Light-reflecting details improve the wearer's visibility in low-light settings, making for a safer ride.

OPTIMAL PANEL CONSTRUCTION
SHIMANO employs sophisticated 3D modeling to shape sections of material for an optimal fit.

TAPED SEAMS
Taped seams serve to improve durability and enhance protection from wind and rain.

CUSHION
Cushioning on top of the foot is engineered to reduce the impact from the shoes.

3D LR
Anatomically designed construction with distinct shapes to match the contours of the left and right feet.

FORM PADDING
Form padding offers protection in case of accidents and reduces fatigue by absorbing the impact of handlebar vibrations.

EASY PULL OFF TAB
Pull-off tabs make it a cinch to take off your gloves.

SOFT WIPING FABRIC
Soft, absorbent terry cloth to mop your hard-toiling brow.

3D PALM DESIGN
A specially configured thumb section is designed to minimize wrinkles when you grip your handlebars.

TOUCHSCREEN COMPATIBLE
Conductive fabric on index and thumb works with touchscreen devices.

WATERPROOF
Selected fabrics are designed to prevent water penetration, even under heavy rain conditions.

WATER REPELLENT
Durable coating still repels water after numerous wash cycles.

UV PROTECTION
The upper side of the material is designed to protect you from harmful UV rays.

PACKABLE FUNCTION
The built-in self-packing pouch lets you quickly store your jacket in a compact, easy-to-carry package.

AERODYNAMIC
Aerodynamic shaping reduces air resistance to support more energy-efficient riding.

BONDED SEAMS
Flat-finish, lightweight and durable seam construction.

ARCH PANEL
This section of the sock helps to keep the arch of the foot raised to prevent fatigue.

VENTILATION
Mesh knitting enhances ventilation to keep you dry and comfortable.

SILICONE GRIP
Non-slip silicone is used on palm and finger sections to ensure a secure grip and stable handling.

EASY CENTER PULL OFF TAB
Pull off tab for easy removal.

FLEXION FREE
SHIMANO's proprietary glove design won't hinder your wrist movements, letting you ride in comfort.

3D ANATOMIC DESIGN
The entire glove has been designed to a 3D pattern that fits the natural contours of your hand.

BRUSHED INSIDE
The soft touch of a brushed inner layer promotes warmth and comfort.

WATER RESISTANT
Water resistant materials are able to withstand light showers and moderate exposure to water.

WINDPROOF
Designated windproof items significantly reduce the heat-sapping effects of wind.

ANTIMICROBIAL (TO REDUCE ODOR)
Antimicrobial technology works invisibly to provide all day protection and comfort. Usage of antimicrobial on textiles is not meant to replace standard laundering or hygiene practices.

FIT TYPES

TIGHT FIT
Tight Fit garments have been designed without compromise to boost your performance. Engineered with 3-dimensional patterning, they deliver an aerodynamic advantage.

SLIM FIT
The Slim Fit provides an optimal blend of performance and comfort. Slim Fit garments give you support where needed while still enabling full freedom of movement.

COMFORT FIT
The Comfort Fit offers ease and comfort to the sports-minded cyclist. This fit hugs your body without being either too tight or too baggy.

TOUR FIT
Tour Fit garments have been specifically engineered to give you maximum comfort and freedom of movement while riding in variable conditions.

YOU DON'T CARRY
SHIMANO BAGS,
YOU WEAR THEM

IF WE DON'T HAVE A BAG TO CARRY IT, CHANCES ARE YOU DON'T NEED TO BRING IT ALONG

We understand that sometimes rides involve baggage. But an improperly weighted, bulky bag can ruin even the best day on the bike. A bag that isn't engineered for cycling can swing erratically, raise a rider's center of gravity, and steal momentum from every pedal stroke. SHIMANO bags are engineered for cycling, and only cycling. You don't carry our packs, you wear them.

FUSION CONCEPT bags are packed with innovation, and scientifically modeled, designed and tested to haul the goods. We've studied rider's backs and their position on the bike from the ground up. We have run every physical scenario in the lab, and on the road and trail. The result? Bags that are engineered to function beautifully, designed to conform comfortably, and built to go everywhere.

DIFFERENT NEEDS DIFFERENT BAGS

There is no single ride type, so we've engineered five different Performance and Explorer Bags to handle all your carrying needs. Feature-packed details combine with body-contoured straps to create a bag that can be used every day.

PERFORMANCE BAGS

UNZEN 4 ENDURO
ENDURO RACING

Comfort, ventilation, great fit, and ergonomic

X-HARNESS
Free movement of shoulders, great fit, easy adjustability, and stability

TOKYO
CITY TOURING

Comfort, ventilation, ergonomic, and shape retention

ERGONOMICALLY CURVED (NORMAL TYPE)
Heavy duty, ventilated, stylish, office on the go

DON'T CARRY THE WEIGHT OF YOUR WORLD ON YOUR SHOULDERS

SHIMANO packs are precision engineered for any task. Every part of the UNZEN bag is 3D-modeled and built to fit your form. Our X-HARNESS is specially designed with a harness hook to let you make quick and easy adjustments. X-HARNESS moves with you, shifting weight as you move, and provides the optimal fit with extra ventilation. Adventures require extra gear, and the UNZEN is just the bag to pack it.

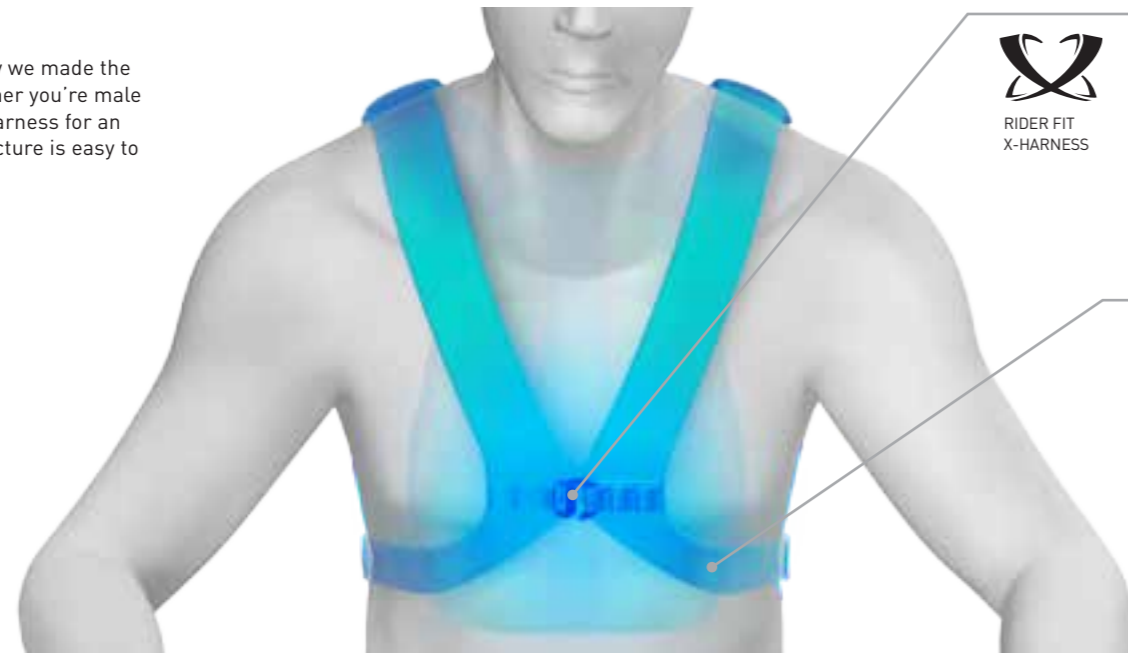

THE X-HARNESS IS SPECIALLY DESIGNED TO LET YOU MAKE QUICK AND EASY FITTING ADJUSTMENTS.

ADJUSTABLE HARNESS

People come in all shapes and sizes. That's why we made the Rider Fit X-HARNESS fully customizable. Whether you're male or female, tall or short, you can fine-tune the harness for an optimal fit. The lightweight hook-and-loop structure is easy to adjust and doesn't add excess weight.

SIZING

- 190 ~ 198 cm [6'3" ~ 6'6"]
- 180 ~ 190 cm [5'11" ~ 6'3"]
- 170 ~ 180 cm [5'7" ~ 5'11"]
- 160 ~ 170 cm [5'3" ~ 5'7"]
- 150 ~ 160 cm [4'11" ~ 5'3"]

RIDER FIT
X-HARNESS

HARNESS HOOK

A specially-designed harness hook lets you make quick and easy fitting adjustments. Relax the harness when you're climbing, and then tighten it when you're on a white-knuckle descent.

ADJUSTMENT FLAP

For optimal fit, you can adjust the tightness of the bag from beneath the harness.

HOW TO ADJUST THE FIT

Make a few quick and easy set-up adjustments to achieve an optimal fit.

Open the back panel of the bag and adjust the harness position according to your height.

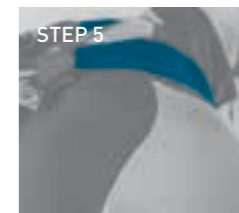

Make sure the buckle is fastened securely at the solar plexus.

Adjust the length of the lower portion of the harness.

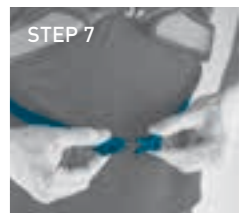

Achieve a better body fit by adjusting the flap for tightness. (On the Type A only)

Make sure there is no space between your shoulder and the harness when you lean forward.

Adjust the harness hook position according to your riding situation.

When necessary, the included waist belt offers additional support.

UNZEN 4 ENDURO

WITH A 3D BODY-FITTING DESIGN AND STABILIZING WAIST BELT, THE LIGHTWEIGHT 4-LITRE ENDURO RACEPACK MEETS THE DEMANDS OF OFF-ROAD RACING.

The UNZEN 4 ENDURO is specifically designed for the demands of all-mountain competition. With the updated X-HARNESS system, it's the secure off-road race pack in the market. Comfortable during high-exertion activities, it also holds a day's worth of gear. The trail-specific mesh back pad keeps you cool and dry all day long.

BAGS ICONS

FEATURES

HYDRATION RESERVOIR COMPATIBLE
Hydration compatible bag is equipped with a dedicated section for securely holding the hydration system.

HELMET HOLDER
Attached to the bag is a special storage section for holding your helmet.

HARNESS HOOK
A specially-designed harness hook lets you make quick and easy fitting adjustments. Relax the harness when you're climbing, then tighten it when you're on a white-knuckle descent.

RAIN COVER
Select SHIMANO bags feature a brightly colored rain cover to prevent leakage. When not in use, the rain cover stows away in a pocket.

EYEWEAR HOLDER
Loop on shoulder strap provides quick storage for your eyewear.

LIGHT ATTACHMENT LOOP
A rear-mounting light-attachment loop works in tandem with reflective elements.

LAPTOP COMPARTMENT
A separate padded compartment provides a soft-lined storage space for your laptop or tablet.

EYEWEAR DESIGNED
FOR RIDERS, BY RIDERS

EYEWEAR WITH THE WINNING EDGE

Riding in the pro peloton places demands on eyewear that is far beyond those of an “everyday” ride. Throughout the 2016 season, LottoNL-Jumbo riders worked with Team SHIMANO product developers to evaluate and update our eyewear offerings. The Eyewear Collection showcases the results of this collaborative process.

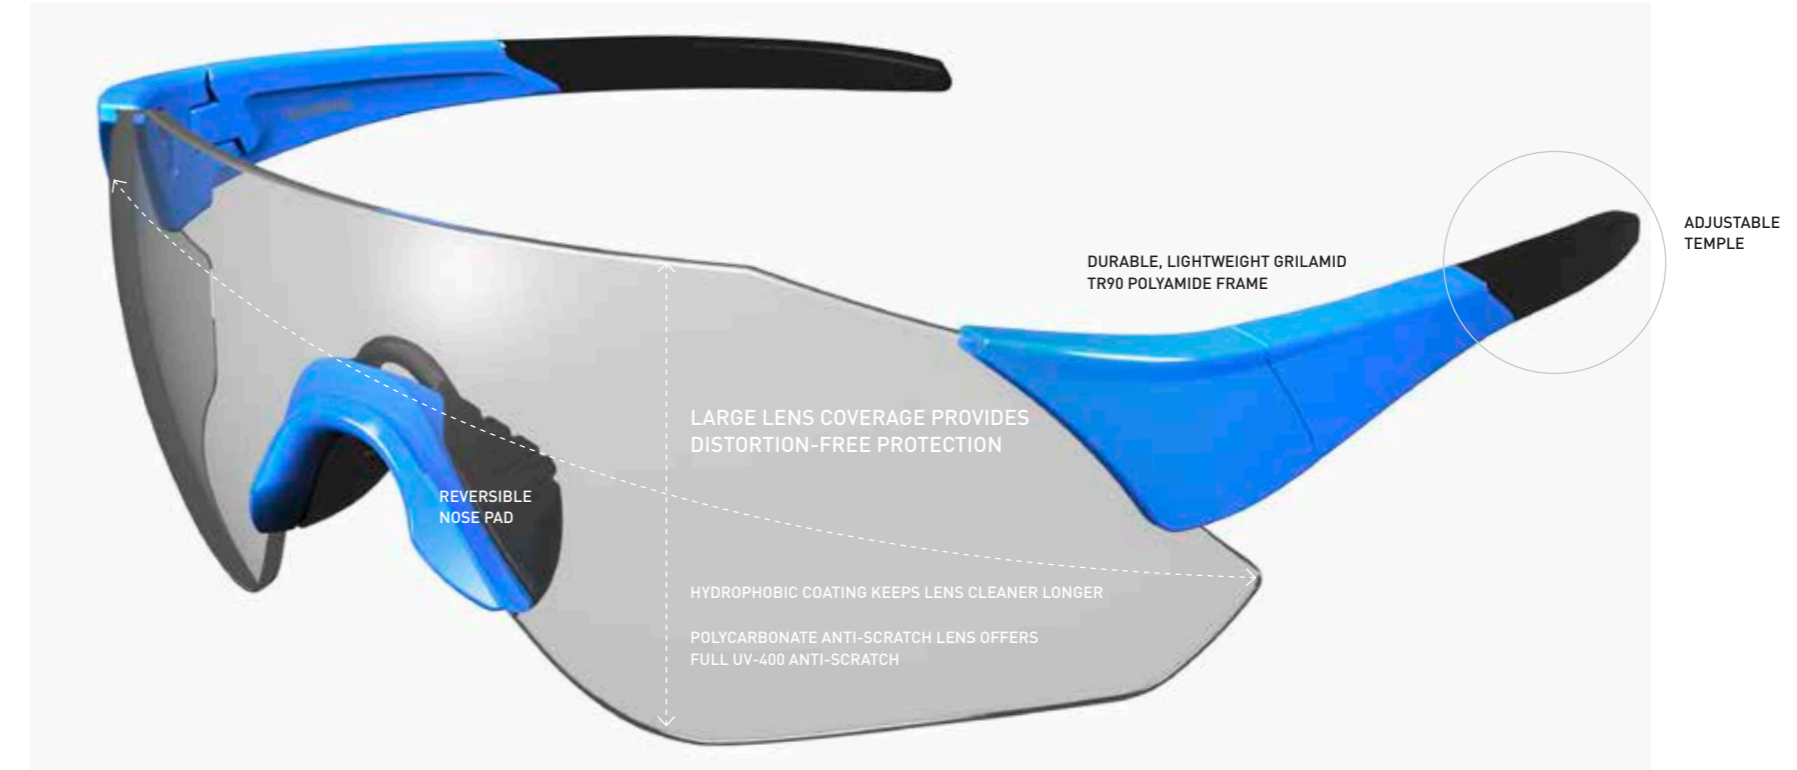

Featuring larger lenses for increased coverage protection, darker lens tint offerings for better bright-light conditions, and improved anti-scratch performance — all additive to the world-class optics and cycling-oriented style SHIMANO is known for.

SHIMANO Eyewear. See what you’ve been missing.

CYCLING SPECIFIC DESIGN

Eyewear is one of the core components of cycling gear. We focus only on the requirements of cycling when we design our glasses. It's eyewear purpose-built for the demands of road, mountain, trail, city, and everything in between.

ADJUSTABLE TEMPLES

The last thing you need are temples that are too high, too low, too loose, or too tight on your head. With SHIMANO adjustable temples, you ride in comfort.

REVERSIBLE NOSE PAD

Fit is adjustable with the reversible nose pad, which has different thicknesses in the front and back. Includes an extra XL reversible nose pad for a CUSTOM-FIT.

ADJUSTABLE NOSE PAD

Let's face it, every nose on every face is different: wider, thinner, higher, lower, pointed, classic. Achieve the optimal fit with the adjustable nose pads. Why settle for anything less?

INTERCHANGEABLE LENSES

Easy-to-change with no pivots or pins to break, SHIMANO interchangeable lenses let you fine-tune your vision for your ride. Available for S71R, S61R, EQUINOX, SPARK, AEROLITE, SOLSTICE, and S71X models.

PRESCRIPTION CLIP
SHIMANO S71X, EQUINOX, SOLSTICE, and S51X models can be customized by your optometrist with our RX-CLIP.

LENS TECHNOLOGIES

Lens technologies are the core of every optic program, and SHIMANO lenses are engineered to the highest standards: ours.

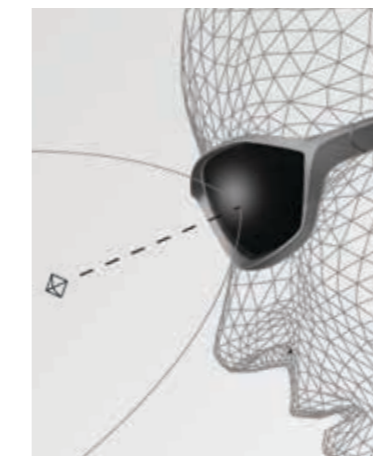

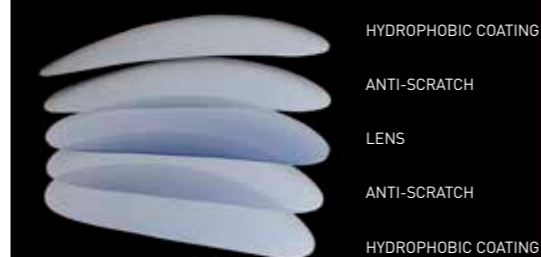

POLYCARBONATE LENS

SHIMANO lenses feature polycarbonate substrates for superior impact resistance, reduced weight and performance in a wide range of temperatures. Full UV-400 anti-scratch coatings insure a clear view under all conditions. All SHIMANO lenses feature a decentered optics to provide distortion-free vision which reduces eye fatigue.

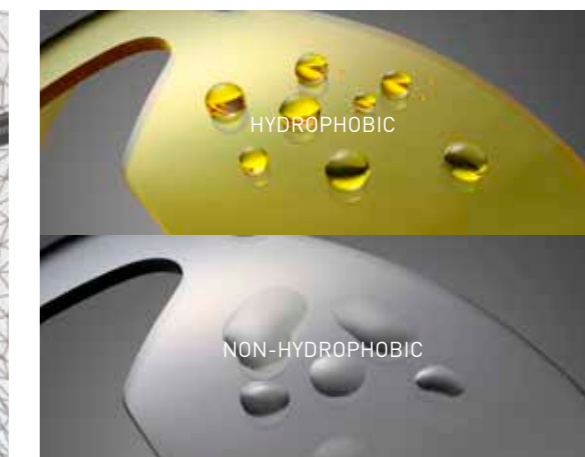

We impact test lenses to anticipate real world riding conditions to ensure that our lenses withstand and protect against small incoming obstacles, such as insects, branches and pebbles.

COATING APPLICATIONS

HYDROPHOBIC TECHNOLOGY

Hydrophobic (HP) coatings are applied to outer and inner lens surfaces to increase water-repellency and to keep lenses from attracting dust, oil and dirt. HP lens stay cleaner longer, and are easier to maintain.

RX TECHNOLOGY

The RX-optimal clip transforms the standard S71X, EQUINOX 3, SOLSTICE, and S51X into a prescription-ready sport frame. The clip attaches closeto the lens for an optimized fit.

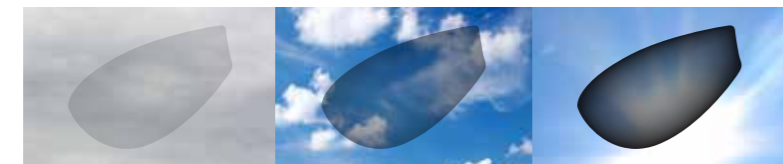

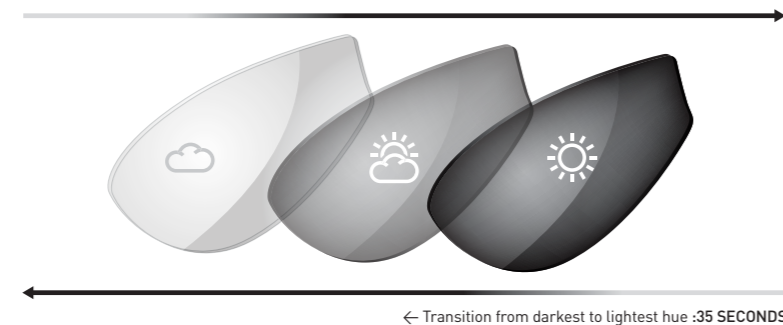

LENS COLORS

SHIMANO offers a variety of lens colors to allow the rider to select the best choice depending on the riding needs and conditions.

PHOTOCHROMIC LENS

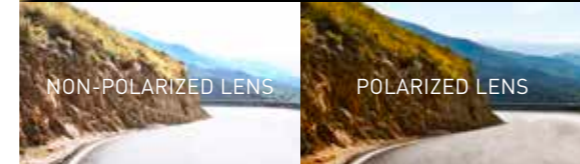

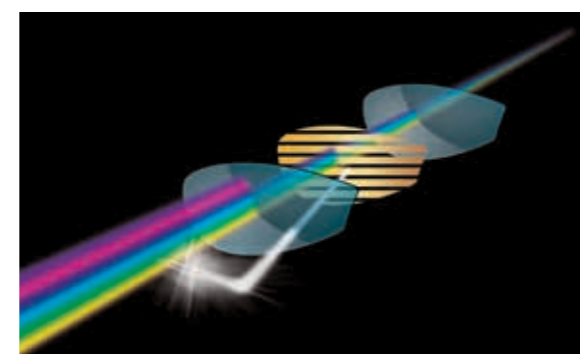

Photochromic (PH) lenses change visible light transmission percentages when exposed to UV light. No need to stop and change lenses during changing light conditions. When the surroundings are dark, the lenses are almost clear. When bright, the lenses turn a darker hue. SHIMANO eyewear features PH GRAY 17-85% and PH DARK GRAY 13%-62% transmission.

8 SECONDS: Transition from lightest to darkest hue →

POLARIZED LENS

Polarized (PL) Dark Gray Red Multi Layer Coating lenses reduce glare and reflections from various objects such as pavement, water, and glass. They ensure a clear view with excellent distance perception. The lenses' visible-light transmittance is set at 14.1%, making them ideal for riding on sunny days.
